

Ratabase

Pricing and product innovation are key to success for insurance carriers in an increasingly disrupted marketplace. Ratabase drives both, putting the best tool in your hand for changing your pricing and products as fast as the market demands.

The ‘gold standard’ in insurance rating

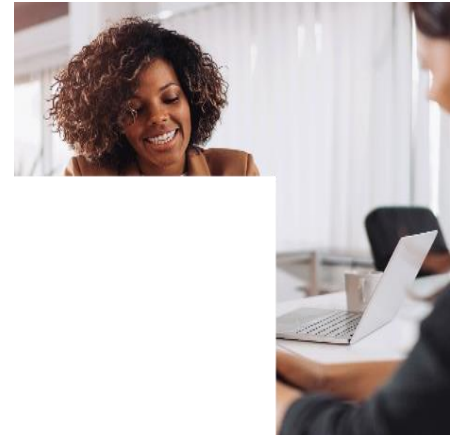

With more successful installations than any other solution in the industry (100+), CGI’s Ratabase is the premier rating and rules engine in insurance today. Ratabase is a rating and product configuration solution that enables insurance agents and consumers to generate policy price quotes in real time. It provides actuaries and business analysts with a collection of sophisticated modeling tools to keep pace with the latest marketplace trends and pressures in determining insurance rates.

Ratabase helps insurance carriers:

- Save: Reduce the effort and cost to maintain rating and rules
- Sprint: Move your business from “a walk to a run” by speeding time to market and quickly pivoting to meet changing conditions
- Simplify: Build once and deploy to any environment: Cloud, Windows, Midrange or Mainframe
- Spark: Innovate with a rating engine that can handle any pricing scenario, no matter how complex

Product Builder

Actuarial, pricing and product development specialists use Product Builder to identify, build and test formulas, rules and tables used to rate and price your business. Featuring a streamlined workflow and intuitive interface, Product Builder clients have reported up to 75% improvement in days to implement changes and a 50% reduction in staffing needed to support rating.

Powerful, award-winning

- XCelent Award recipient for functionality, customer service and client base
- 30+ years serving the insurance industry
- Partners with 12 of the top 20 global insurers
- 100+ live implementations
- Sub-second response time per rating request (~1,000 transactions in less than 5 seconds)
- Processes 60% of Gross Written Premium (GWP) in U.S. alone
- Clients have experienced:
 - 75% improvement in days to implement changes
 - 50% reduction in staffing needed to support rating

Production Calculator

The Production Calculator provides the power and capability to rate policy transactions in real time at the sub-second level. It is a multi-platform (Linux/Windows/Midrange/Mainframe), highly scalable and highly reliable performance engine with flexible on-premise or public/private/hybrid cloud deployment models. The Production Calculator has multiple integration options and has been integrated with many policy administration, quoting, pricing and agency management systems.

Apps and utilities	
EMMA (Environmental Monitoring & Management)	Integrates Ratabase with a DevOps continuous delivery pipeline and supports IT audits by validating deployments and monitoring system performance
Distribution	Packages rating products developed in Product Builder for deployment to one or more runtime environments
Load	Loads deployment packages produced by the Distribution utility into a runtime environment
Output Designer	Design and maintain professional output pages using table and formulas built by the business user through Product Builder
Data Validator	Enables rate tables to be accessed by other systems to help eliminate duplicate data entry
Reports	Allows users to select data and produce reports for table, formula and field data
Distribution Import	Allows fields, tables and formulas from one Product Builder database to be imported into a separate Product Builder database
STEPS Viewer	Easy-to-use graphical interface for viewing output from the Production Calculator
WSDL Generator	Provides the interface specification in a Web Service Definition Language (WSDL)-based view
Reports Designer	Enables business users to design and produce custom reports using table and formula data

Discover why CGI receives the highest client satisfaction scores of any insurance rating vendor, averaging 9.7 out of 10. Contact us today.

Ratabase is a trademark or registered trademark of CGI Inc. or its related companies.

“It is rare for a vendor to win an XCelent award, and rarer still for a vendor to win more than one award. CGI’s Ratabase product won an unprecedented three XCelent awards in this year’s review of rating engines.”
