

Benchmark your organization using the CGI Voice of Our Clients

A global antenna for industry best practices to improve returns on your IT and business investments

Each year, we gather client views on the trends affecting their organizations and industries. Through the CGI Voice of Our Clients, we analyze these findings to provide a valuable global antenna by industry—based on facts, not hype—to benchmark best practices that lead to continuous improvement.

Our anonymous benchmarking data comes from a knowledge-base that reflects insights from 5,500 client organizations located in countries representing 82% of the world's IT spend across all economic sectors. It represents 1 million data points provided from our face-to-face conversations with executives, averaging 1,500 interviews each year.

Insights you can act on

CGI consultants can compare data among peers and across industries and geographies. We offer benchmarking based on client insights on such topics as:

- Industry trends
- Business priorities
- IT directions and priorities
- IT spending (operating expenses and capital investments)
- Innovation investment
- Digital strategies and initiatives
- Cybersecurity and data privacy practices
- Cloud usage
- Intelligent automation
- IT managed services
- IT human capital
- Business and IT alignment

Depth of CGI's data

7,470

face-to-face conversations held with our clients over the past 6 years

1 million

data points collected

50/50

split between IT and business executives

31 million

employees across represented enterprises

\$11 trillion

in annual revenue across responding organizations

\$371 billion

of annual IT spend

All figures in Canadian dollars. Data represents a subset of CGI's global clients and their self-reporting on budget, revenue, and other key metrics.

Industries include banking, communications and media, energy and utilities, government, health and life sciences, insurance, manufacturing, retail, consumer and services, space, transportation and logistics. We can draw upon these comparisons and conduct consulting sessions to share the findings to support the development of your strategies and business planning.

Business and IT alignment and the journey to world-class IT

When there are gaps between business and IT executive expectations, advancing your organization's agenda is challenging at best. Becoming a top performing enterprise requires a strong governance model between the business and IT sides of the organization, focused on year-over-year improvement efforts.

We provide benchmarking on clients' satisfaction with the 10 attributes that define a world-class IT organization. The anonymized data for industry peers across geographies provides a foundation to help you achieve continuous improvement.

The resulting insights identify ways you can align more closely the activities of your business and IT leaders.

CGI's Journey to World-Class IT methodology helps you increase alignment between business and IT, driving forward the governance model and requisite processes that achieve continuous improvement. This methodology is based on our benchmarking data and best practices from decades of successfully delivering enterprise-wide consulting, systems integration and managed IT and business process services.
