CGI Gateway360

CGI

CGI Gateway360 provides a single gateway to third-party credit information services, sophisticated data analytics for better, faster credit decisions, and robust identity and fraud management capabilities.

With CGI Gateway360, finance organizations gain access to a broad set of credit information capabilities from a single, SaaS-based platform, including the following:

- **Decision management** – Develop, simulate, execute, experiment with and measure various customer decision strategies across the relationship cycle using CGI's customer-based business rules engine.
- **Credit strategy management** – Improve the effectiveness of your credit risk strategies with the help of CGI subject matter experts who can provide a detailed strategic analysis that supports strategy experimentation and continuous improvements.
- **Bureau access and flexible summarization** – Access all major North American consumer and business credit bureaus and use flexible, business-rules driven summarization capabilities to support ever-changing credit decision requirements.
- **Bankruptcy notifications** – Discover, monitor and manage changes in bankruptcy case information with automatic notifications to enhance the efficiency of collections and recovery bankruptcy processing. Integrate directly with the U.S. bankruptcy court system's Electronic Bankruptcy Noticing to quickly identify new filings and updates.
- **Property services** – Gain access to industry-leading providers for real estate appraisals, title searches, flood certifications and tri-merge credit bureaus.
- **Asset valuations** – Acquire real-time access to automobile valuation service providers.
- **Fraud prevention** – Combat identity fraud through fraud prevention strategies that are commensurate with specific consumer transaction risks.

Benefits

- Make better, faster decisions based on more accurate and up-to-date information, including meaningful, business-specific summaries
- Digitalize and automate processes for accessing business critical data sources, drive efficiencies and reduce IT burdens through CGI hosting and maintenance services
- Add new services faster and more easily to meet changing business needs and stay current with products, vendors, regulations, software, etc.
- Access a robust and continually growing inventory of services that can be configured to support your unique processes, policies and requirements and implemented in any order
- Minimize operational risks through the delivery of services from CGI's secure data centers and the encryption of shared data

- **Vendor / agency management** – Share data and collaborate with third-party partners through CGI's agency management solution, which supports automated and manual secure data exchange via standard or vendor file formats.
- **Rapid implementation methodology** – Access credit services quickly through CGI's proven rapid deployment and implementation approach. Because no applications are installed onsite, implementation typically can be provided within 90 days.

Why CGI Gateway360

CGI Gateway360 is powered by CGI Enterprise Gateway (third-party and vendor management and credit strategy management), Strata Enterprise (risk scoring and decision management), and IDENTICATE (identity management and fraud verification) to support its broad set of credit and collections gateway services.

It also can be seamlessly integrated with core credit management applications. For example, CGI Gateway360 integrates with the following CGI solutions:

- CACS Enterprise (collections and recovery)
- CGI Collections360 (end-to-end default management)
- ACAPS Enterprise (loan originations)

Integrating CGI Gateway360 with collections and recovery, default management, loan originations and other credit management systems provides simplified access to outside collections agencies, major consumer and business credit bureaus and external information service providers, automating business processes, driving efficiencies and reducing costs.
