Space4Climate COP26 collaboration

23 September
CGI, Signatory of We Mean Business Open Letter

Bottom panels

We partner with and sponsor Project Seagrass. Using our technical expertise in Earth Observation and CGI Geodata360 we will support Project Seagrass to identify the healthy seagrass meadows and raise awareness of its benefit to reduce the UK's Carbon Footprint.

CGI is supporting the UK Government £20M pledge to establish the Blue Belt Programme protecting vital marine habitats around the UK's 14 Overseas Territories.

We're working on a Digital Twin Earth Precursor project with ESA and partners including Oxford University Innovation to develop a Food Systems Digital Twin.

CGI supports Forestry England through developing the eTimber platform, enabling sustainable usage of natural resources and the responsible preservation of woodlands across England.

SensorInsights 360 will be implemented through a Smart City Operations Centre, for the City of Edinburgh Council. This real-time data platform delivers an end-to-end approach to the Internet of Things (IoT), asset data collection and asset management.

We are working on AI4EO Wildfires, combining Earth Observation, AI and cloud computing to track devastating fires.
