

# Digital infrastructure services

As biopharma organizations begin to see positive clinical data and regulatory feedback to indicate the potential of a product launch, their biggest challenge yet is transitioning from a pure R&D organization to a commercial entity.

Suddenly there is a ramp up of organizational functions and business processes, requiring business technology infrastructure to support a variety of activities and collaboration locally and globally. Time, resources and budget drive a lot of decisions. Leadership teams often lack strong start-up experience and hence the road to commercialization can seem a daunting task at times.

CGI's digital infrastructure services provides an end-to-end assessment and mapping of the business technology roadmap. And, with a number of partners, CGI also supports the stand up and integration of systems and tools to help the organization's prepare for commercialization. Guided by years of experience working with biotech and pharmaceutical companies business technology initiatives, we provide business and IT expertise to recommend the best fit commercial IT roadmap for the near and long term, considering portfolio growth.

CGI is uniquely positioned as an end-to-end Life Sciences solutions provider helping clients transform their business processes and digital platforms... to succeed in a patient-centric, connected health ecosystem and improve patient outcomes.

- An experienced team: We have over a decade of experience with over 80 life sciences companies, assisting a number of them to stand up or improve their digital infrastructure.
- Strong partnerships: CGI is a vendor agnostic partner with many software and hardware organizations across the globe to support and tailor your needs with efficiency
- A tailored approach: We understand the variables that go into structuring and standing up an IT infrastructure. We ensure that

## Working with CGI

We are a partner that will help you address your business challenges head-on. CGI takes pride in its experts, delivery model and partnerships for every client:

### **The right delivery model**

Ideal blend of service and resources availability through its local offices in Pennsylvania and New Jersey, and cost optimization through its US and India offshore delivery centers.

### **The right team**

We provide business and IT experts across the biopharma value chain to support the enterprise strategy from end to end.

### **The right partnership**

CGI is vendor agnostic with many software and hardware partners allowing you to have a strong PMO to manage multiple teams with trust and transparency.

requirements are tailored to the specific needs of the program and aligned to your company's strategy.

- Holistic business and IT expertise: We have experience across a broad range of functional areas within a life sciences company, from R&D, manufacturing, supply chain, commercial operations and regulatory compliance, to the corresponding data and information systems used by these groups.

## Benefits of CGI's digital infrastructure services:

- Strong implementation partner globally and across multiple domains – from R&D to commercial and manufacturing
- Holistic three-pronged approach that provides an end-to-end, management of the “flow” from strategy to execution to ensure enterprise-wide alignment, agility and resilience

- Our three-pronged approach leverages strong working knowledge of agile that allows teams to:
  - Focus on “imperatives” vs. “functions”
  - Innovate through shorter and flexible designs
  - Centralized implementation of solutions
  - Embed a digital culture from the onset
  - Work faster and more efficiently locally and globally
- Our approach prepares your organization with a capability roadmap at pre-launch state, support virtual engagement at launch in a hybrid launch model and ability for commercial analytics and other digital innovations in post launch or steady state to remain competitive and deliver customer value.
- Our experts also design your roadmap such that at each state of being, there is the vision of the art of the possible with further digital capabilities. Future thinking allows for budget allocation and prioritization of needs to align with shareholders expectations.

**Are you preparing for your first product launch? Or do you want to explore more digital capabilities for upcoming launches?**

It's time to start the conversation about your objectives, your planning needs and how CGI can help make the art of the possible so you get to market faster and in full compliance.
