

Sunflower Work Management Solutions

Managing the full asset lifecycle is a complex process. Managing the work associated with keeping assets operational creates challenges for any organization.

Sunflower Work Management

Sunflower Work Management is a web-based and mobile software platform that allows organizations to manage configurable work processes such as asset maintenance, inspection, shipping, disposals, and more. Work Management takes Sunflower beyond asset management tracking and compliance, enabling organizations to execute critical operational tasks. The software includes the ability to manage work requests, work orders, and task assignments to manage complex work activities.

Take Control of Business Processes

The Work Management solution enables organizations to track detailed information and provides powerful capabilities to manage critical business processes. Configurable dashboards, metrics, and reports provide further insight into operational effectiveness. Sunflower Work Management is accessible from any major web browser, and is also optimized for iOS and Android mobile devices. The software platform is fully integrated with Sunflower Assets™ and other external systems such as human resources and financial applications. Built-in role based security and controls allow an organization to decide who has access to what processes and data.

Improve efficiency of work management
