

# Ratabase Output Designer

Ratabase Output Designer streamlines the generation and maintenance of rate manual filings and reports, ensuring accurate and professional output that is controlled by the business user.

## Advanced features

With Ratabase Output Designer, business users can integrate Ratabase rate tables and formulas into professional output pages. At the same time, they can quickly and easily produce compliant materials for submission to state insurance regulators.

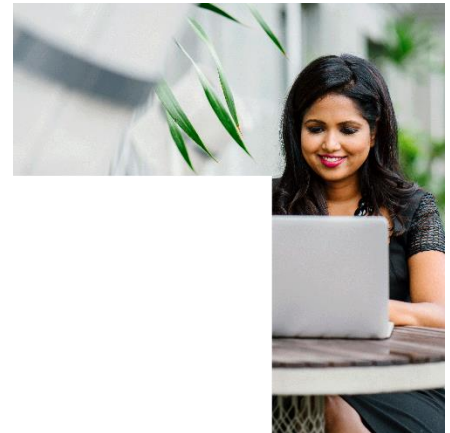

Advanced features enable a range of tasks to be performed, including the following:

- Production of regulatory filings (e.g., DOI reports) and agency manual pages
- Testing and results comparison for quality assurance purposes
- Reports on remote intranet/internet access by agencies
- Retrieval of rate table data from the Ratabase database and rate revision development
- Manipulation of Ratabase data to transform and compare with other systems
- Generation of new rate page results from templates in real time, improving efficiency
- Saving of output as generated templates in a Ratabase report format (removing the need to send live spreadsheets to agencies and regulators)

## Powerful benefits

Ratabase Output Designer delivers a range of powerful benefits:

- **Ensures accuracy** by pulling rate and formula data directly from the Ratabase database without the need to copy and paste or re-key information
- **Streamlines workflows** by reusing rate pages (design, development, publish), eliminating duplicate work effort and

## Ratabase
