

# CGI Advantage Insight

CGI

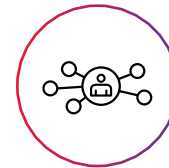

As technology advances at an unprecedented rate, government organizations are tasked with analyzing and consuming increasing amounts of data. While this task can be complex and stressful, it doesn't have to be. With CGI Advantage Insight, your organization will gain increased visibility, proactive decision support, and real-time feedback through a variety of data visualization options.

## CGI Advantage Insight

### Advanced analytics:

Assist your organization with data analysis, trends identification, and decision support utilizing robust, dynamic dashboards providing unmatched interactivity.

### Configurable inquiries:

Define, interact with, and share on-the-go visualizations using a guided experience that increases efficiency and data comprehension.

### Traditional reporting:

Meet statutory reporting requirements with configurable, user-friendly row and column reports.

# Gain proactive decision support with advanced analytics

Visualize information, identify trends, and efficiently interact with your data through powerful, dynamic dashboards. Leverage robust interactivity, including the ability to drill down to more detailed information and/or related data to view relevant information all from one screen.

**With natural language search capabilities, you make your dashboards work smarter. By simply typing a question, you can change the layout of a chart, extract data points, or compare information.**

Most importantly, advanced analytics don't simply help you visualize your data, they support and enhance your decision making processes. Built-in machine learning and artificial intelligence uncover previously unseen data insights and turn your dashboards into a tool to solve complex organizational challenges, monitor goals, and better understand the needs of your business.

With ADA-compliant advanced analytics, CGI Advantage Insight delivers an inclusive solution that supports efficient government operations for your organization.

# Gain proactive decision support with advanced analytics

Advanced analytics allow your organization to gain visibility, leverage decision support, and measure information against your organizational goals or KPIs. This carbon emissions interactive dashboard is just one example of these powerful analytics. With insights into eligible remote workforce, commute hours saved, and overall CO2 emissions, organizations gain an in-depth view into their environmental impact.

# Visualize data on-the-go with configurable inquiries

## Increase efficiency and visualize data instantly

CGI Advantage Insight provides a guided, user-friendly experience that allows your users to set parameters and create analytics on-the-go. Have you ever been looking at rows of data and wanted to consolidate it into a more organized visual or compare data over time? Configurable inquiries solve this challenge without the need to navigate to a different page or application. With the ability to filter and refine the data for your visualization, you only see the information you want to see, when you want to see it. Furthermore, users can drill through these configurable inquiries to related data and save or share inquiries – encouraging increased collaboration through a modern, intuitive interface.

# Modernize your traditional reports with CGI Advantage Insight

## Customizable views for optimized results

- Upgrade your row and column reports with visually highlighted trends, patterns, and summary information.
- With pixel perfect formatting, you have the power to design and control the layout of your reports, increasing compliance and reducing data clutter.
- Each report can be shared in multiple formats, ensuring data consistency across your organization.
- Realize further efficiencies, increase accuracy, and eliminate the need to navigate to third party systems with our CGI Advantage native reporting tools.

# Your partner now and in the future

CGI Advantage Insight will help your organization improve data transparency, simplify analysis, and provide proactive decision support. Whether you need tools to create dynamic dashboards or an easy way to create analytics on-the-go, CGI supports your reporting needs through a robust technology suite and a focus on continuous innovation.

## About CGI
