

Leveraging the Machine Learning Lifecycle

CGI AccelerateAI360

We are helping organisations overcome the challenges within their Machine Learning (ML) lifecycle, in order to leverage their data to make rapid and informed decisions

We understand the challenges you face:

Most organisations don't have an Enterprise strategy for the development, management and scaling of ML solutions

Hackers are extremely sophisticated in their attempts to penetrate key business defences and exploiting AI to find weaknesses

ML and Data Science expertise is in very high demand, globally

On-premise customers are forced to buy expensive packaged solutions

Data scientists often end up working in silos leading to lost opportunities, inefficiencies, lack of governance

Cloud providers are a closed ecosystem and obscure important detail behind SaaS architecture

What we offer

CGI AccelerateAI360

Data sprints

Complimentary 'try before you buy' data sprints where our experts can help you assess your current capabilities and develop a strategy to unify and unlock the value of your data.

Deep sector and industry knowledge

From Space to health to retail, we combine our industry and sector expertise with the best in breed technology so we can develop the right solution for you and ensure outcomes are achieved quickly.

Open source

We are not bound to a restrictive and perpetual software license or a closed platform ecosystem, we don't have to be around in the background long term if you don't want us to be.

Cloud agnostic

Works natively on all cloud providers or on-prem so you can use your vendor of choice without compromising on the tools or outcomes.

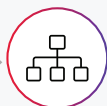

Automation tools

Deliver faster value and empower non-specialists to automate machine learning capabilities using pre-defined tools.

Safe & secure

Security is at the heart of everything we do so you can be assured whether in the cloud or on-premise your installation is safe and secure from attacks.

Modular architecture

Our modular ML architecture and microservices accelerate ML projects from prototype to production, delivering value faster and reducing duplication of effort across projects and initiatives.

Flexible commercial & engagement models

We tailor our deal model to whatever fits you, there is no stock offering or lines so you can be guaranteed to get the best deal for your needs.

A technology agnostic approach blended with our deep industry and delivery capabilities

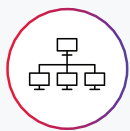

CGI AccelerateAI360 is more than just an open and advanced MLOps platform. Our proposition blends CGI's deep domain experience with our industry expertise, so we can collaborate with you to help achieve your business outcomes:

Deliver organisational efficiencies by exploiting the hidden value of your data via AI, ML and MLOps

Reduce duplication of effort across projects and initiatives

Accelerate the realisation of value through modular ML architecture

Increase throughput and improve latency by reducing network management traffic overheads

A safe, secure and extendable AI/ML platform that is open-source and cloud agnostic

Overcome complex challenges to deliver business-critical solutions by leveraging the Machine Learning lifecycle

Make more accurate predictions and better informed decisions, faster

Increase data quality by reducing human error (and the need for manual data entry)

Empower non-specialists to automate machine learning capabilities

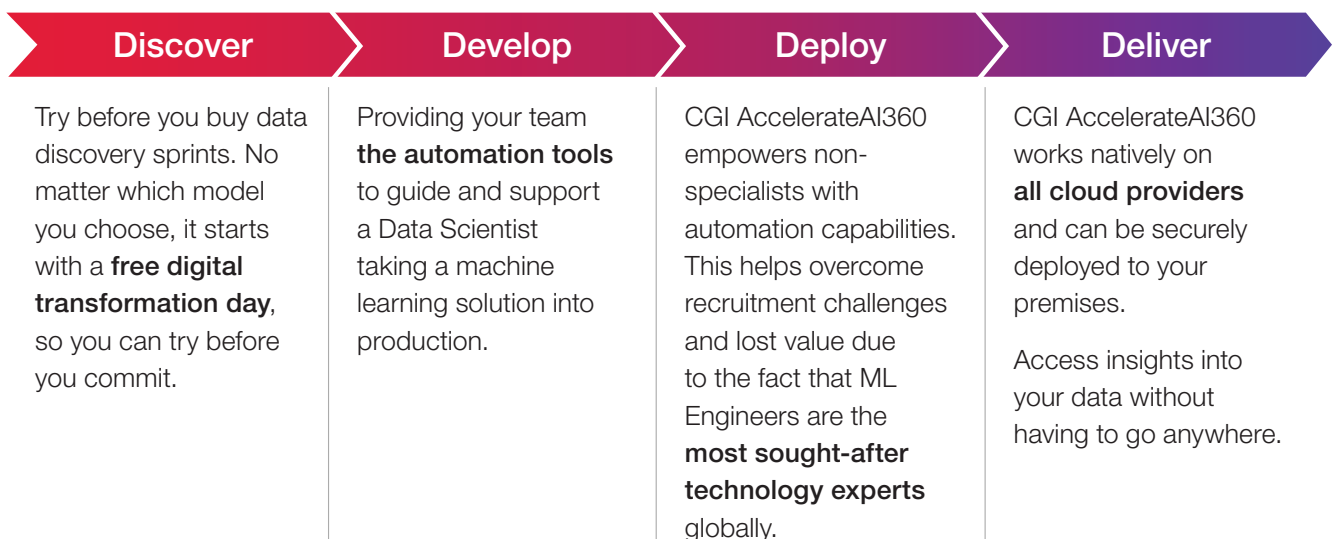

Privilege automated systems that deliver real business value

Our Process

CGI AccelerateAI360 is the only open source cloud-agnostic end-to-end machine learning engineering solution in the market. Our modular ML architecture accelerates ML projects from prototype to production, delivering value faster and reducing duplication of effort across projects and initiatives.

Benefits

CGI AccelerateAI360 uses a technology agnostic approach, blended with our deep industry and delivery capabilities, in order to overcome complexity and deliver accuracy.

Through our advanced technologies, we offer the following key benefits:

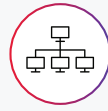

Leverage the value of your data to make better predictions and decisions whilst reducing operational costs.

Reach unprecedented levels of autonomy and efficiencies from smarter insights.

Manages all aspects of the Machine Learning delivery lifecycle, giving your team the strategy, automation tools and microservices to guide and support you through the process of taking a machine learning solution into production.

Innovate and scale your ML and AI capabilities from your first manipulation of the data, through model training, to the implementation of your rich, advanced Machine Learning models.

Deliver both real value and organisational efficiencies by exploiting the hidden value of your data via AI, ML and MLOps.

Empower non-specialists to automate machine learning capabilities and reduce the need for advanced data scientists.

Flexible pricing and operating models enable clients to scale the solution at their pace.

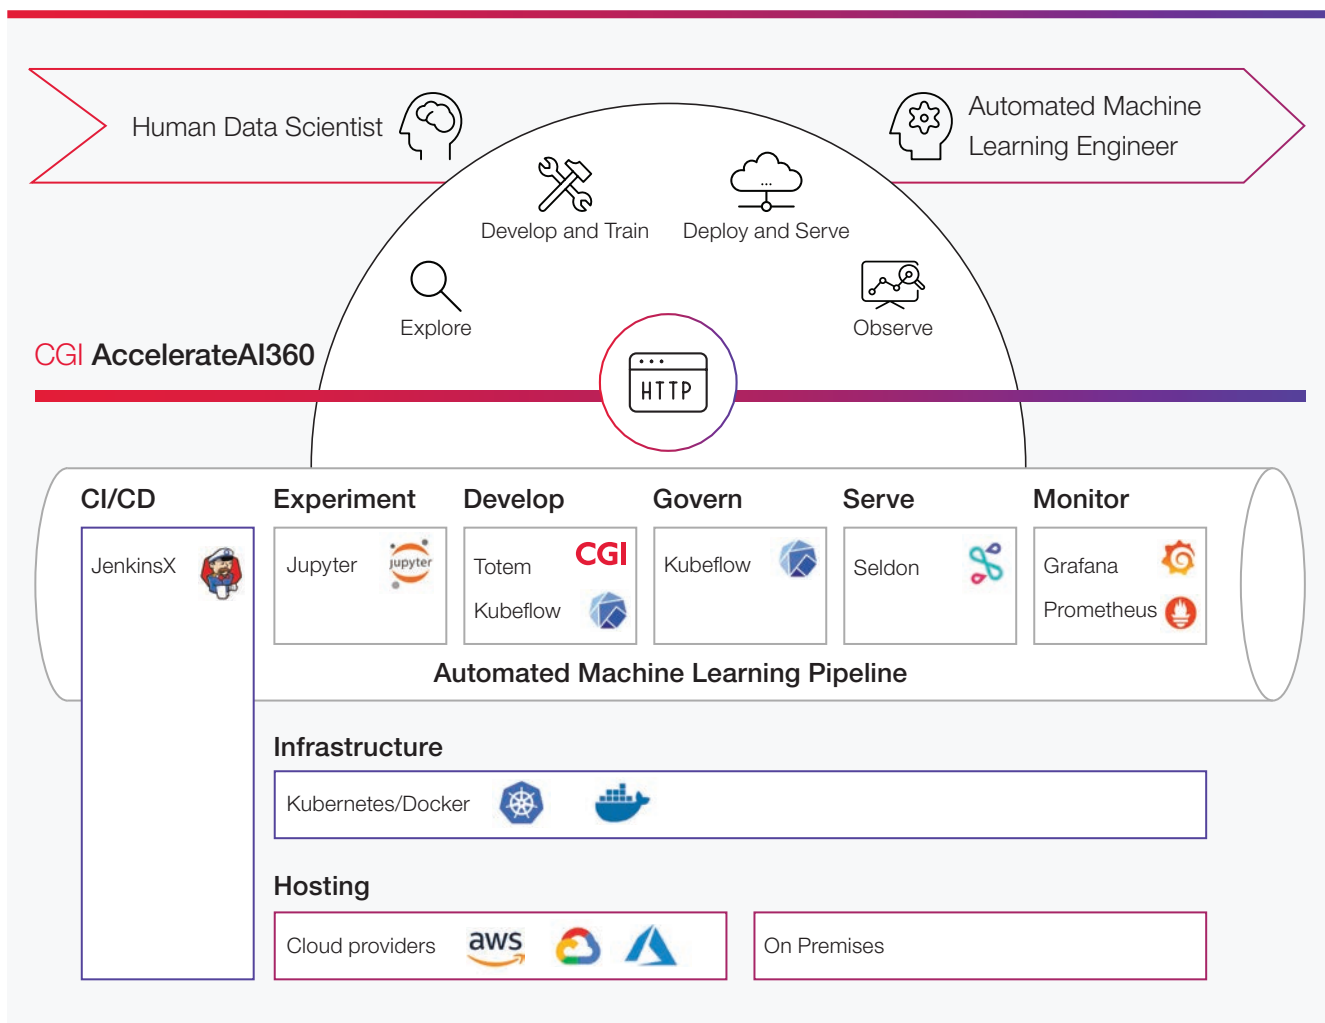

Simple and flexible deployment/integration options minimise risk, disruption, and costs.

Reduce operational costs, transform organisational agility, and increase scalability through automation.

World-class tools and technologies

Why choose CGI AccelerateAI360

A technology agnostic approach blended with CGI's deep industry and delivery capabilities

More than just an open and advanced MLOps platform. Our proposition blends CGI's deep domain experience with our industry expertise so we can collaborate with you to help achieve your business objectives.

Global & specialist expertise

We don't just provide you with a safe, secure and extendable AI/ML platform. Our global expertise delivered on a local level means we can help with every aspect of bringing initiatives into reality with a robust and industrialised approach.

Try before you buy data sprints

Our complimentary data sprints will help us rapidly and effectively establish where you are in your data journey and how we can best accelerate you to the place you need to be. This allows you to assess the return on your investment before starting the engagement and measure the success throughout.

Partnership & quality

For us, partnership and quality are both a philosophy and a way of life. We constantly deepen our understanding of our clients' business and we develop and follow the best management practices.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI delivers end-to-end services and solutions, including strategic IT and business consulting, systems integration, intellectual property, and managed IT and business process services.

CGI works with clients through a local relationship model complemented by a global delivery network to help clients achieve their goals, including becoming customer-centric, data-driven digital enterprises.
