CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.
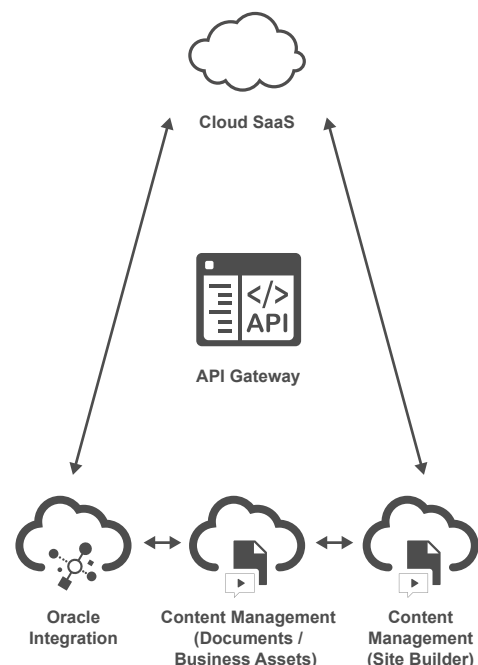

PaaS for SaaS

Complement the functionality of the SaaS services that you have (in any cloud) through the multiple services of Oracle Cloud PaaS. This will allow you to extend the functionality of these SaaS services, improve their connectivity, increase your security and analyze the data in greater depth.

Content & Process for SaaS

Exploit all the advantages of Oracle Cloud (no maintenance costs, pay per use and resources, fast provisioning, high security and 24x7 monitoring) to extend your SaaS solutions integrated with business processes. Include these collaborative tools to improve collaboration within your organization.

Pack steps

– Configuration of Cloud components: Integration Cloud (OIC) and Content Management.

– Architecture design including Cloud Services.

– Development of a OIC process using up to 10 activities and 5 roles, optional use of documents.

– Define and create content types and page layouts.

– Development of a site with Content Management Cloud with up to 5 pages.

– Documentation.

– Development and best practices guide.

– Training for developers and administrators.

– Optional maintenance and support.

Cloud SaaS

API Gateway

Oracle Integration · Content Management (Documents / Business Assets) · Content Management (Site Builder)

Implementation

8-12 weeks
