# CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.
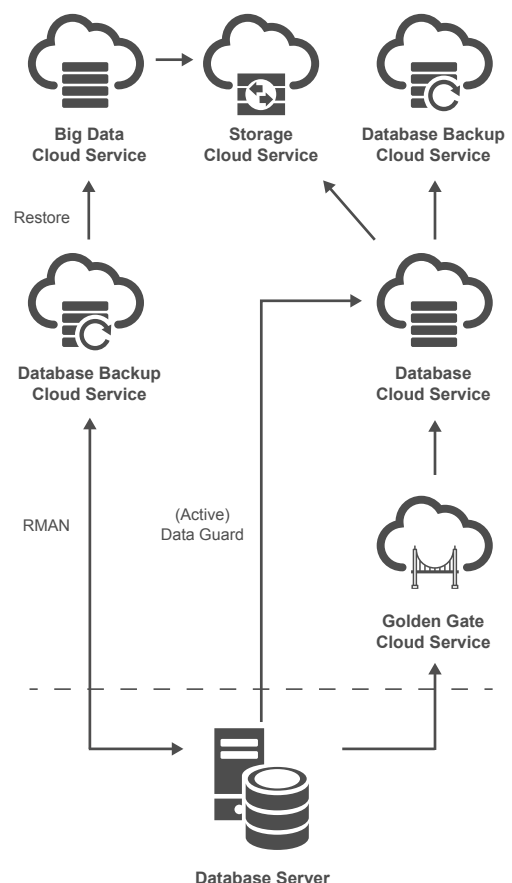

## Disaster Recovery

Use the cloud as a backup to your On-premise Oracle services. These packs are designed to increase the availability of your On-premise systems and have different degrees of coverage in the event of a contingency: backup to be able to restore on your data center; backup to restore on the cloud itself; complete replicated system to activate when necessary.

# Database Disaster Recovery

Using this service, you can have a copy of your database on Oracle Cloud. According to your needs and budget we will choose the best technical solution to protect your data on the cloud. That database in the cloud, as well as On-premise database, can be safeguarded with Oracle Database Backup Cloud Service.

### Pack steps

– Analysis of requirements (RPO-RTO).

– Provision and configuration of the Cloud components: Database Cloud Service, DB Backup Cloud Service, Data Guard Service and Storage Cloud Service.

– Backups and/or replication settings.

– Recovery tests.

– Knowledge transfer.

– Optionally, integration with the existing On-premise infrastructure.

Implementation

🗓 1-3 weeks
