CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.
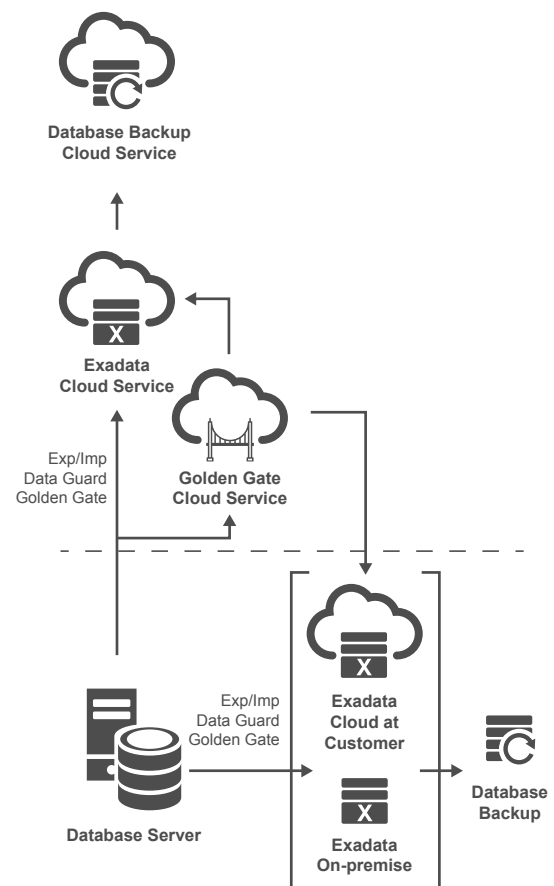

Database

Enjoy a fully scalable, simple, flexible and highly available cloud database. Implement from small databases to high-performance needs. You can even opt for autonomously managed and automated databases, optimized for transactional or analytical environments.

DDBB Consolidation on Exadata

Exadata is the best platform for Oracle database deployment. Its unique performance, scalability and security features enable you to improve the performance and productivity of your applications. If you have a significant installed base of Oracle Database, consolidating on Exadata in any of its deployment models (Exadata On-premises, Exadata Cloud at Customer or Exadata Cloud Service) will allow you to optimize your resources, reduce the need for new licenses and obtain at the same time a substantial performance improvement.

Pack steps

– Study of the current situation and the expected evolution of the DB platform.

– Study of support contracts.

– Analysis of evolution options.

– Analysis of database migration and upgrade requirements.

– Acquisition and implementation of the Exadata platform (On-premises, Cloud at Customer or Cloud Service).

– Migration of existing databases, using export/import, Data Guard or Oracle Golden Gate depending on downtime and source infrastructure.

– Adaptation and renewal of associated systems (backup, clients, applications, monitoring...).

– Knowledge transfer.

– Platform support.
