CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.

Custom Development

Easy, quick and streamlined implementation of any application in the public cloud, freeing workload from your data center. Deployment of legacy applications, J2EE and your backend with APIs, Node.js, PHP or Ruby. Your development team will be able to work in collaboration in a cloud-based environment and, through cloud developments, you will be able to complement your SaaS services.
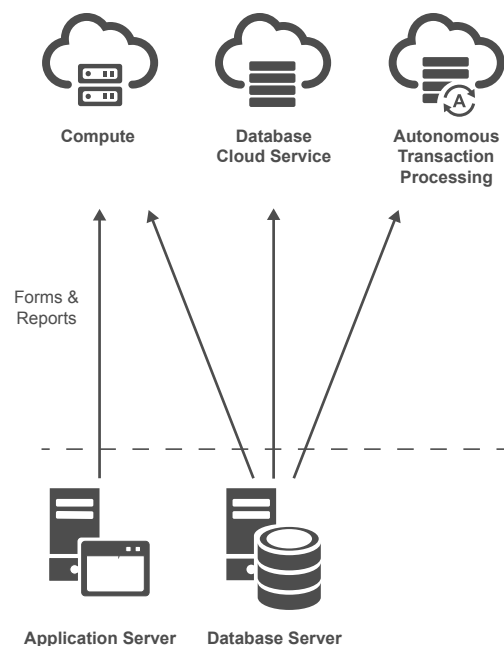

Forms & Reports migration to OCI

Thousands of applications developed with Oracle Forms & Reports continue to support the transactional systems of many organizations. There is no specific cloud service, but it is possible to migrate these applications to Oracle Cloud, either by moving only the database layer, either the application layer, or both.

Pack steps

– Cloud Services configuration: Compute, Storage and Static IP, Database.

– Database data migration (to the same version) up to 200Gb.

– Migration of Forms & Reports configurations. *

– Migration of Oracle Forms & Reports applications. **

– Compilation of Forms and Reports.

– Switch over to the Cloud.

– Optional: maintenance and support.

* Starting from a 3-tier configuration (from 10gR2).

** In case of a client/server application, a previous study of the obsolete functionalities would be performed and it could take some more time.

Compute   Database Cloud Service   Autonomous Transaction Processing

Forms & Reports

Application Server   Database Server

Implementation

4-5 weeks
