

CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.

Integrations

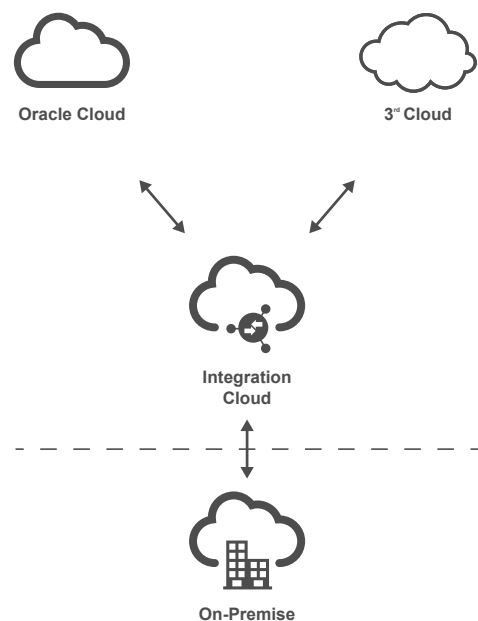

Through cloud services you can integrate: your data using E-LT processes (extract, load and transform); its systems through modern services of integration of APIs and web services; your IoT devices managed with a real-time gateway. All this, integrated with your business applications on-premises or in the cloud.

Integration Cloud

One of the most critical aspects of moving to the cloud is the integration of your On-premise systems with the new cloud systems. However, using Oracle Integration Cloud Service you can declaratively integrate your range of SaaS applications and your developments in Oracle PaaS or any other cloud. It also allows the deployment to be performed quickly and securely.

Pack steps

- Configuration of the Cloud components: Oracle Integration Cloud (OIC).
- Architecture design including OIC.
- Security modelling that includes the Cloud service.
- Development and publication of 3 services.
- Functional and loading tests.
- Documentation.
- Development and good practices guide.
- Training for developers and administrators.
- Optional maintenance and support.

Implementation

3-4 weeks
