

CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.

IaaS

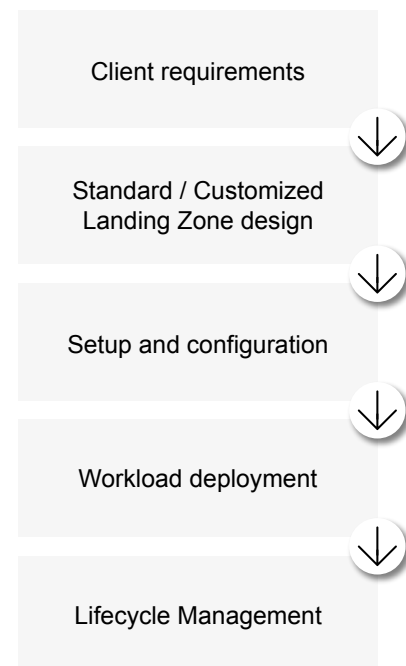

Deploy and execute any workload on the IaaS of Oracle Cloud, a business level, high-performance and cost-effective infrastructure, administered and supported by Oracle. It covers storage, nodes (bare metal, GPU and virtual machines), containers and cloud services aimed at improving communications with your data center.

Landing Zones Implementation

Enable Cloud Adoption with Best Practices. Drive cloud adoption throughout the enterprise, continuously adding business workloads in a governed, organized and secure tenancy with design best practices applied to all resources. Landing Zones allow the standardization of a cloud native operating model, having standard provisioning and monitoring processes.

Pack steps

- Review of customer technical, identity and access management, governance, data security, network design, and logging requirements.
- Selection of standard template or design of a customized environment.
- Definition of conceptual architecture, along with basic configurations for key components.
- Select Infrastructure as Code implementations for relevant components.
- Definition of governance policies and strategy.
- Definition of identity and access policies.
- Networking & security design.

Implementation

1-3 weeks
