CGI Fly to Oracle Cloud

Packaged services for our clients to start their journey to Oracle Cloud in a fast and secure way. Solutions on hybrid architectures combining Oracle Infrastructure and Platform. Part of this portfolio is included in the Boost your cloud initiative, led by Oracle.
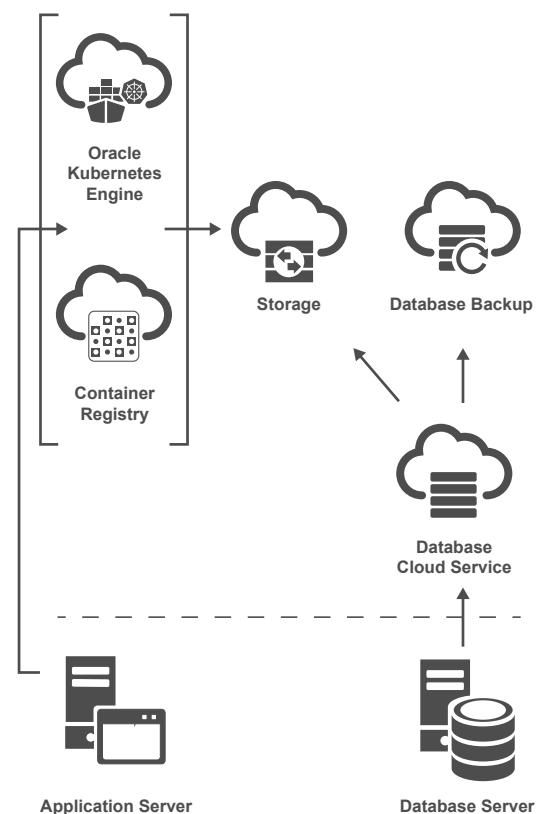

Custom Development

Easy, quick and streamlined implementation of any application in the public cloud, freeing workload from your data center. Deployment of legacy applications, J2EE and your backend with APIs, Node.js, PHP or Ruby. Your development team will be able to work in collaboration in a cloud-based environment and, through cloud developments, you will be able to complement your SaaS services.

Migration of Applications to the Cloud

Simplify and accelerate the migration of the applications from Oracle to the cloud. Execution on the cloud offers agility and growth to the business, reducing costs and risks. It allows the use of the same management and operation tools, facilitating a common hybrid cloud strategy.

Pack steps

– Analysis of requirements of the existing system.

– Estimation of growth.

– Provision of systems on OCI.

– Migration of applications.

– Migration of data.

– Security settings.

– Functional tests.

– Training sessions for Cloud operations.

Oracle Kubernetes Engine

Container Registry

Storage

Database Backup

Database Cloud Service

Application Server

Database Server

Implementation

📅 4-6 weeks
