

# Systems integration

Federal agencies operate in an IT environment characterized by a constant need for innovation. Agencies require a systems integration (SI) model that can change with the environment while emphasizing service management and user experience.

The need for expert integration services in today's federal market is more urgent than ever. As agencies seek to deliver seamless services that extend from their core systems to modern customer-facing apps, they are bringing in data and functionality from more and more sources, both internal and external.

Additionally, the end-to-end supply chain is considerably more visible to the public than it once was. As a result, agencies must make sure that their mission-critical systems are properly integrated, assuring data integrity and accuracy along with robust security.

CGI has decades of experience in bringing together systems and technologies for clients. Our systems integration professionals routinely help agencies find practical solutions to business problems through the integration of technology, whether in the form of standalone applications or integrated platforms and services.

CGI's systems integration practice delivers a comprehensive and tailored approach to every project, from requirements to deployment to ongoing maintenance of the technology infrastructure. For large-scale, platform-enabled integrations, we combine the strength of industry-leading platforms — including SAP, Oracle, our own Momentum® and others — with our knowledge, creativity, and industry expertise.

## Who we are

**180+**

federal organizations trust CGI's SI Services

**45+ years**

servicing the federal government

**7,000**

federal-focused professionals

## Key elements of our systems integration model include:

### Systems integration lifecycle (SILC)

Our methodology contains repeatable processes to support federal financial, procurement and asset management system integration and implementation.

### Integrated security support

Provides proactive, business-aligned strategies that improve risk management, productivity, data integrity and compliance.

### IP-based solutions

Turns services into business accelerators — CGI has built more than 175 reusable enterprise applications, giving us the knowhow to consult, design, develop, implement, manage and integrate a myriad of systems and technologies.

### Global delivery network

Provides the best combination of value and expertise. Our delivery centers provide clients with access to the right skills from the right locations at the right time and for the right price.

**CGI has decades of experience in bringing together systems and technologies for clients.**

About CGI

### Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments.

Nearly 7,000 of our experts help the U.S. federal government achieve comprehensive, scalable and sustainable IT and business goals. We enable our clients to execute digital transformation, build the federal workforce of the future, achieve operational excellence, enhance citizen engagement and protect America's assets. As the federal government faces

unprecedented challenges, we remain committed to enabling its success, using our deep understanding of clients' goals and mission-essential needs to provide consultative insights and develop solutions for maximum results.
