# CGI -SAP S/4HANA Cloud
# **Smart Professional Services**

**CGI**

**Downward pressure on fees, increased regulatory scrutiny, new service delivery models, lack of resources and intense competition are accelerating the pace of business while slowing profitability.**

**Many Professional Services organizations are aiming to move their back-office and core processes to the cloud. Organizations in the industry are striving to achieve the next level of process automatization and efficiency by moving their ERP system back to standard.**

## The intelligent enterprise

The intelligent enterprise allows its employees to focus on high value-added tasks instead of manual, repetitive work by adding innovative, intuitive, and intelligent features into its business system.
With a digital age user experience, actionable insights with analytics and the possibility for next generation automation with machine learning, SAP S/4HANA Cloud provides you with what you need to run and adapt your business to the digital world we live in today.

## S/4HANA Cloud for Professional Services

CGI offers through SAP S/4HANA Cloud for Professional Services, a modern and future proof ERP that is at the core of the intelligent enterprise. The ERP covers the complete end to end process for companies within the professional services industry. It supports various business models such as customer projects, service business and subscription billing. With a cloud system, you will always be provided with the latest innovation which means you can instantly leverage the latest technologies while at the same time driving continuous business transformation.

## IMPLEMENTATION

The implementation of a new S/4HANA Cloud system follow as Fit-to-Standard way of thinking, where the SAP Best Practices to the furthest extend are implemented in the new ERP. The implementation methodology we are using is the efficiently proven SAP Activate.

By following the SAP Activate Methodology and having a fit-to-standard mindset a new S/4HANA Cloud system for Professional Services can be implemented in 14 weeks.
