

CGI Trade360 Receivables

Solutions meet emerging
seller-centric supply chain
finance needs

When your client says, “I want my bank to help me improve my days sales outstanding (DSO)”...

With CGI Trade360, you can significantly improve their DSO by:

- Monetizing receivables early
- Accelerating cash applications to invoices

Benefits

Client (Seller)

- Reduce cost of capital through improved days sales outstanding
- Support liquidity management by monetizing invoices on demand access, low-cost finance rates (suppliers)
- Improve efficiency of receivables payment/invoice matching
- Handle domestic and international receivables
- Benefit from multi-currency, multi-bank capabilities

Bank

- Promote long-term client relationships
- Obtain integrated receivables technology without a large initial investment
- Manage seller-centric integrated receivables on an integrated platform with traditional trade and cash management
- Achieve a high degree of straight-through processing
- Provide new revenues with minimal operational staff
- Leapfrog the competition with rich functionality
- Provide services on a truly global basis—domestic and international
- Benefit from multi-currency, multi-bank capabilities
- Benefit from denied party screening

When the bank needs to offer new solutions to meet emerging seller needs ...

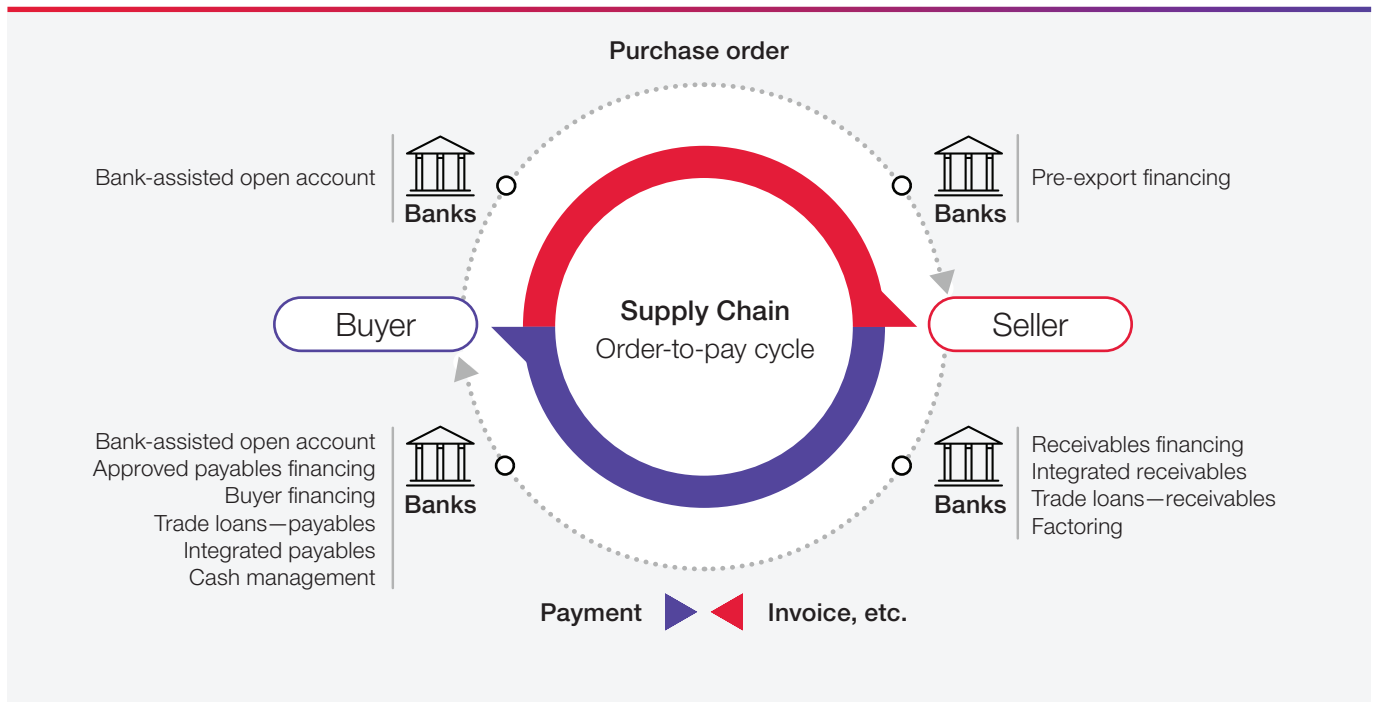

With CGI Trade360, the bank can move beyond traditional products to support a range of seller-centric solutions, including pre-export financing, receivables finance, and integrated receivables.

The financial supply chain continues to receive the close attention of corporate treasurers looking for ways to optimize working capital and free up cash in their supply chains. In particular, there is a growing demand for receivables financing as a means of helping treasurers improve DSO.

Additionally, many corporates are burdened by needing to devote significant resources to reconcile payments to invoices, with largely manual and inefficient methods that negatively impact DSO rates.

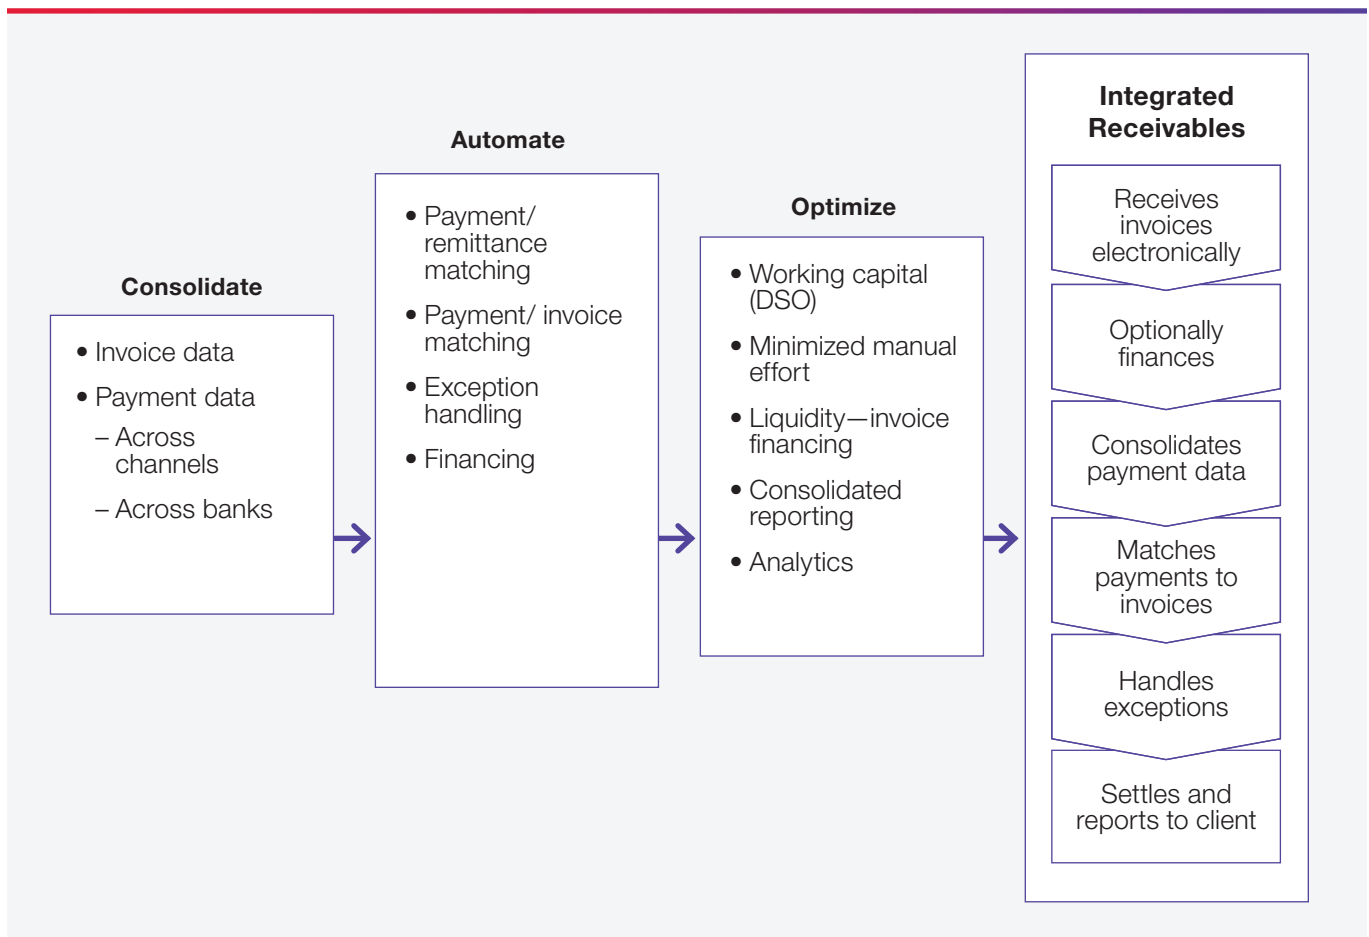

Banks already handle their clients' in-bound payment and remittance data, which places them in an ideal position to perform payment/invoice reconciliations. CGI Trade360 provides a higher degree of straight-through reconciliation processing, enabling the bank to provide these services without significantly increasing bank staff.

Faster, more efficient application of received cash improves clients' DSO and optional invoice financing, while waiting for payment to arrive provides even more significant opportunities for DSO and working capital improvement.

Integrated Receivables

Integrated receivables significantly reduces a seller's payment-to-invoice reconciliation effort and assists with working capital/liquidity optimization.

Key functionality of integrated receivables

- Consolidation of transactions
 - Electronic receipt of invoices
 - Consolidation of payment data from all bank receivables channels and payments received through other banks
- Ability to finance invoices while waiting for payment
- Significant reduction in the seller's payment-to-invoice reconciliation effort and support for working capital/liquidity optimization
- Sophisticated and teachable matching engine that applies cash received against the seller's open invoices
- Handling of exceptions by the seller in the portal with automated assistance; for example, the matching engine will propose likely matches from which the seller can choose
- Automatic financing of invoices from the time they are received until payment is received, or financed on demand by the seller
- Online matching rules that enable the seller to teach the matching engine to achieve higher match rates

Offering

Description

Integrated Receivables

- Payment-to-invoice matching
- Invoice financing

Significantly reduces the seller's payment-to-invoice reconciliation effort and assists with working capital/liquidity optimization

- Using a sophisticated and teachable matching engine, the solution applies cash received against the seller's open invoices
- Exceptions are handled by the seller in the CGI Trade360 Portal with automated assistance, including proposed matches by the matching engine
- Invoices can be automatically financed from the time they are received until payment is received, or financed on demand by the seller
- Financing is automatically liquidated when payment for the invoice is received

Pre-Shipment Financing

- Purchase order financing

Provides the seller with financing prior to shipment, often based on an agreed purchase order, to provide manufacturing funds

- Provides financing to the seller at a percent of the purchase order (PO) value
- Can also be created without purchase orders

Rollover Financing

- Purchase order to purchase order
- Purchase order to invoice
- Invoice to invoice

Provides the seller with an extension to current financing, changes to the terms of the current financing, or changes to the underlying asset (purchase order to invoice)

Receivables Financing

Provides working capital/liquidity assistance to sellers by financing their invoices

- Can be used to create standalone receivables financing
- Can be integrated into the receivables management solution

Factoring/ Receivables Purchase

Processes the bank's receivables purchasing (factoring) business, including collection and silent programs
