

Apple strategic assessment

Any successful technology deployment requires a well-planned strategy that aligns with your IT infrastructure, security policies and business objectives. Our Apple strategic assessment provides a **user experience focused and data-driven evaluation** to ensure the secure and efficient integration of Apple devices into your workplace, creating seamless experiences that support your organisation's goals.

Many organisations have built strong foundations on Windows-centric ecosystems – but expanding to include Apple technology presents a powerful opportunity to enhance flexibility, user experience and innovation.

Apple's premium hardware blends style with performance, empowering employees with tools that boost productivity and efficiency. With proven benefits around total cost of ownership, Apple devices are a smart, future-ready investment for modern enterprises.

At CGI, we see Apple adoption not as an IT hurdle, but as a strategic opportunity to create more secure, intuitive and high-performing digital workplaces.

To unlock the full potential of Apple in the enterprise, you need to plan for:

- **Seamless integration** – Ensuring networks, identity management and applications work harmoniously.
- **Strong security** – Aligning with Apple best practices to protect users and data.
- **Efficient deployment and management** – Streamlining processes for IT teams.
- **Optimised workflows** – Supporting great user experiences and sustained productivity.

A clear, data-driven strategy ensures your Apple adoption is smooth, secure and tailored for long-term success, enhancing productivity, streamlining workflows, and driving digital transformation – without disrupting your operations.

We're here to help

Our Apple strategic assessment ensures your organisation is Apple-ready.

With a thorough evaluation of your IT environment we address both technical and organisational factors, helping you develop a tailored roadmap for successful Apple deployment. This empowers your organisation with a secure, efficient and actionable strategy, fully aligned to your business needs.

Through in-depth discovery, technical analysis and expert recommendations, we help you:

- **Assess technical feasibility**, from device deployment and security, to networking and cloud integration.
- **Evaluate organisational readiness** to ensure your IT teams, help desks, and business units are prepared.
- **Identify cost saving opportunities** to optimise your deployment strategy and maximise return on investment.
- **Develop a tailored roadmap** with a step-by-step plan for Apple adoption and long-term success.

Our approach

We leverage industry best practices to assess organisational readiness, working closely with your IT teams and business stakeholders. Our structured approach ensures minimal disruption while delivering maximum strategic value for your Apple deployment.

1

Discovery and stakeholder engagement

We engage with key stakeholders, IT teams and business leaders to understand your organisation's **current IT landscape and strategic goals**. Through stakeholder interviews and workshops, we identify decision-makers, assess your existing technology stack, and determine how Apple adoption aligns with your business priorities.

We also explore **end user needs**, ensuring the transition to Apple supports a seamless, productive workplace experience.

2

Technical assessment

We conduct a thorough analysis of your IT environment to evaluate its readiness for Apple integration. This includes assessing **device deployment and management** strategies, reviewing security policies, and ensuring compliance with Apple best practices.

Our experts examine **networking infrastructure, identity management** systems and **cloud-based** workflows to identify any technical gaps that need to be addressed before deployment. We also evaluate application compatibility and cross-platform collaboration to ensure a smooth transition.

3

Organisational readiness analysis

Beyond the technical landscape, we assess the **wider organisational impact** of adopting Apple technology. This includes reviewing IT **support structures** and **help desk** capabilities to ensure your teams are equipped to support macOS and iOS users.

We examine **HR** and **onboarding** processes to streamline device provisioning for new employees, ensuring **minimal disruption**. Additionally, we assess workflows across different business units to align Apple adoption with **department-specific needs** and ensure a seamless user experience.

4

Recommendations and planning for your adoption journey

Based on our findings, we provide a clear strategy for Apple adoption. Our recommendations include strategies for optimising deployment, improving security, ensuring compliance, and enhancing user adoption.

The strategy is designed to **minimise risk, reduce costs and maximise efficiency**, ensuring a smooth transition that aligns with your long-term IT and business objectives.

We also provide guidance on **best practices, ongoing training and continuous improvement** to help you unlock the full potential of Apple technology.

The outcomes

By working with our digital workplace experts to develop your tailored roadmap, you will seamlessly adopt Apple technology and reap the benefits of:

Comprehensive IT audit

We conduct detailed infrastructure and application assessments to pinpoint strengths and gaps, ensuring your Apple integration strategy precisely supports organisational goals.

Optimised deployment strategy

Leveraging zero-touch deployment and advanced mobile device management solutions, we reduce manual IT tasks and ensure smooth, scalable rollouts of Apple devices.

Enhanced security and compliance

We apply Apple's advanced security features alongside industry best practices in identity management, endpoint protection, and compliance frameworks, safeguarding your organisation from cyber threats.

Cost optimisation, sustainability and higher ROI

We design strategic deployment plans and provide ongoing support services to minimise downtime, reduce operational costs, and maximise your investment in Apple technology.

Improved user experience and productivity

We optimise user workflows through intuitive collaboration tools, proactive IT support, and deployment of high-performance mobile Apple devices, to significantly enhance employee satisfaction, productivity, and flexibility.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-focused to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
