National Cyber Security Centre (NCSC)-Approved Cyber Resilience Test Facility

Enabling innovation with confidence: Secure products, uninterrupted operations

In today's evolving threat landscape, product security is no longer about compliance, it's about resilience. The UK's National Cyber Security Centre (NCSC) has set a new standard, shifting towards outcome, focused assurance that embeds cyber security throughout the product lifecycle. As innovation accelerates, vendors in critical infrastructure, government, and commercial sectors must demonstrate that their technologies are secure, scalable, and ready to withstand real-world threats.

CGI is an NCSC-assured Cyber Resilience Test Facility (CRTF), helping technology vendors confidently develop, deploy and verify secure technologies through the Principles-Based Assurance (PBA) approach. Our experts take a hands-on approach, combining technical rigour with business insight to deliver comprehensive services that support rapid innovation and market readiness.

Key benefits of CRTF testing with CGI:

- Covers a wide range of connected technologies, not limited to security tools

- Enables risk-based, context-aware assurance

- Supports innovation without delay by moving beyond binary compliance

- Provides access to trusted, independent expertise, when and where it matters most

What is the CRTF scheme?

Unveiled at CYBERUK 2025, CRTF establishes a national network of assured facilities, including CGI, that enable vendors to test and prove the resilience of connected technologies in line with NCSC standards.

Why CRTF and PBA Matter for You

Benefit	Outcome
Faster time to market	Secure products delivered at pace, without bottlenecks
Independent verification	Assurance through impartial review from an NCSC-approved partner
Greater customer confidence	Transparency drives trust, accelerating adoption
Improved resilience, lower cost	Fewer security incidents, faster response times, stronger ROI
Regulatory alignment	Frameworks recognised by regulators across sectors

Your business, uninterrupted – with CGI

CGI empowers product vendors to demonstrate resilience, meet regulatory expectations, and scale securely. Our approach is proven, our partnerships are practical, and our success is grounded in results, not hype.

With a global reach and local presence, CGI offers one of the UK's largest cyber security practices, backed by over 250 experts.

Let's work together to build secure, scalable, and market-ready solutions, from the ground up.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-focused to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
