

CGI cyber security

Your mission. Protected.
Your future. Powered.

In a world shaped by digital dependency and disrupted by relentless cyber threats, security is no longer a secondary concern, it is a strategic imperative. The United Kingdom faces growing cyber risks impacting across all sectors, from ransomware threats to intellectual property (IP) theft and supply chain attacks.

In this evolving environment, cyber resilience has become a defining factor in operational continuity, customer trust, and national stability. Whether you're operating critical national infrastructure, delivering frontline public services, managing financial platforms, or scaling cloud-native innovation-cyber security must be embedded, end-to-end.

CGI is one of the UK's largest cyber security providers, trusted by government departments, energy firms, health bodies, financial institutions, and digital-native businesses. With over 1,700 cyber security experts operating globally and deep roots in the UK, we deliver real outcomes, not just advice.

We don't just defend. We empower.

We don't just react. We anticipate.

We don't just advise. We deliver.

Cyber-attacks are escalating in frequency, complexity, and impact. In the past year alone, the UK saw a 33% increase in major cyber incidents, with the average breach costing over £4.9 million. Ransomware accounts for more than 60% of those breaches, and the NHS, education, utilities and finance sectors remain high-risk targets.

Technology is no longer confined to back offices. From cloud-native applications to AI-driven insights and remote operations, digital systems are embedded in every function. But with digital transformation comes an expanded attack surface. Hybrid infrastructures, supply chain dependencies, and regulatory expectations demand a new era of security thinking—one where cyber risk is a board-level priority, not just an IT concern.

At CGI, we understand this reality. We protect more than data, we safeguard missions, reputations, and the future. Our end-to-end approach combines **strategic advisory, hands-on managed services, and proven audit frameworks**. We support organisations throughout the cyber lifecycle: from **threat detection to incident response, strategy creation to regulatory alignment, SOC management to secure digital transformation**.

CGI: Trusted to deliver cyber security with proven impact

CGI is a trusted partner across the UK's cyber security landscape, known for successfully delivering complex, end-to-end IT and Operational technology (OT) security programmes. Our reputation is built on years of hands-on experience, refined through major transformation initiatives, from acquisitions and divestitures to contestability and national-scale change programmes.

We focus on outcomes that matter: reducing risk, building resilience and enabling secure growth. Our success is underpinned by a rigorous, evidence-based methodology and a commitment to client collaboration, working shoulder-to-shoulder to safeguard operations across industries and infrastructures.

CGI cyber security: actionable intelligence, delivered with precision

Every CGI cyber engagement delivers more than advice, it delivers clarity and action. Our services combine precision, repeatability and depth to provide prioritised, actionable recommendations grounded in real-world insights.

We go beyond surface-level analysis to deliver evidence that enables confident, informed decisions. Our experts understand the realities of IT and OT environments, allowing us to provide remediation strategies that both reduce risk and improve operational efficiency.

What sets us apart is our ability to operationalise strategy. Beyond thought leadership, we embed cyber security into daily operations through close client partnership. Our end-to-end portfolio of IT and OT services is designed to:

- Strengthen cyber posture and reduce risk across interconnected environments
- Safeguard availability and continuity of operations
- Minimise disruption and protect safety-critical assets.

Whether supporting complex IT ecosystems or safety-driven OT environments, CGI provides the expertise, assurance and partnership needed to keep organisations running securely and uninterrupted.

Our value proposition

Hands-on. Comprehensive. Proven.

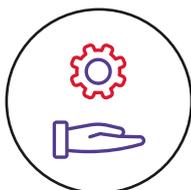

Hands-on approach

We don't just advise. We act. At CGI we work shoulder-to-shoulder with your teams, embedded within your environment to deliver real change. Our cyber experts operate on the ground, whether responding to an incident, building a SOC, implementing identity frameworks or preparing for GovAssure reviews. We're practical, visible, and committed.

We don't hide behind reports-we roll up our sleeves.

“Clients deal directly with the people doing the work. That's where trust is built.”

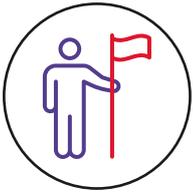

Alex Woodward, Senior Vice President, Cyber Security UK

Comprehensive services

Cyber security isn't a single product. It's a continuous discipline. We offer a full range of services, from strategy and risk advisory to penetration testing, incident response, and engineering. Whether you need to establish Zero Trust, secure OT environments, or implement DevSecOps, we've got every angle covered.

We design for now, and build for what's next. With CGI, there are no gaps, just full coverage.

Proven success

Our credentials are earned through delivery. We have helped UK organisations pass GovAssure assessments, implement secure cloud migrations, and recover from nation-state-level attacks. Our services are certified to ISO 27001, 22301, 27701, NCSC CHECK, CREST, and Cyber Essentials Plus.

We deliver outcomes, not just outputs.

- 1 **1,700+** cyber professionals
- 2 **24x7x 365** threat response
- 3 Global capability, local proximity
- 4 Industry-leading client retention

“We do difficult things well.
Our clients don’t want theory, they
want resilience.”

Alex Woodward, Senior Vice President, Cyber Security UK

Our cyber security service offerings

Managed cyber security services

- Intelligence led SOC
- Managed XDR
- Vulnerability management
- Phishing
- Incident response - breach support
- Digital forensics
- IAM managed service
- IAM implementation service
- IAM essentials
- NCSC CHECK pen testing
- NCSC cyber resilience test facility
- Purple & red team testing
- Artificial intelligence monitoring
- Overarching cyber as a service - offering for SME
- Crypt-key
- Corporate / Personal Digital Footprint Analysis
- External attack surface management

Cyber security advisory/consultancy services

- IAM implementation service
- IAM essentials
- NCSC CHECK pen testing
- Purple & red team testing
- Crypt-key
- Cyber GovAssure assessment framework
- Risk management advisory - to include assurance maintenance (Plan)
- Cyber innovation advisory
- IAM strategy
- Cyber strategy
- Cyber resilience (business continuity) - Root cause analysis / incident review process / policy
- Secure by design
- Production of ISMS / IEC62443-201:2010 (OT) Threat modelling / assessment / analysis
- Supply chain risk management
- CISO as a service
- Security architecture and engineering - include controls to requirements mapping
- NCSC aligned tabletop exercises
- Identity and access audit
- Code assurance
- Common criteria
- Cloud security audit
- Blue team audit
- Corporate / Personal Digital Footprint Analysis
- Artificial intelligence assurance
- Cyber maturity assessments marketing
- Incident response planning
- Digital forensics
- Security management plan
- Payment Card Industry Data Security Standard (PCI DSS)
- Quantum readiness assessment

Let's protect your business - uninterrupted.

Whether you're just starting your cyber transformation, preparing for GovAssure, or facing an emerging threat, our experts are ready to help.

Your Business. Uninterrupted.

Your success relies on resilience. Our cyber services are designed to deliver it every day.

Hands-on. Comprehensive. Proven.

Let's talk about securing your future.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-based to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
