

Leverage the automation potential, turn building data into lower costs and better control with PROCEMS

PROCEMS. Tried and tested. Selected by leading companies across the globe

We developed PROCEMS with one goal in mind:

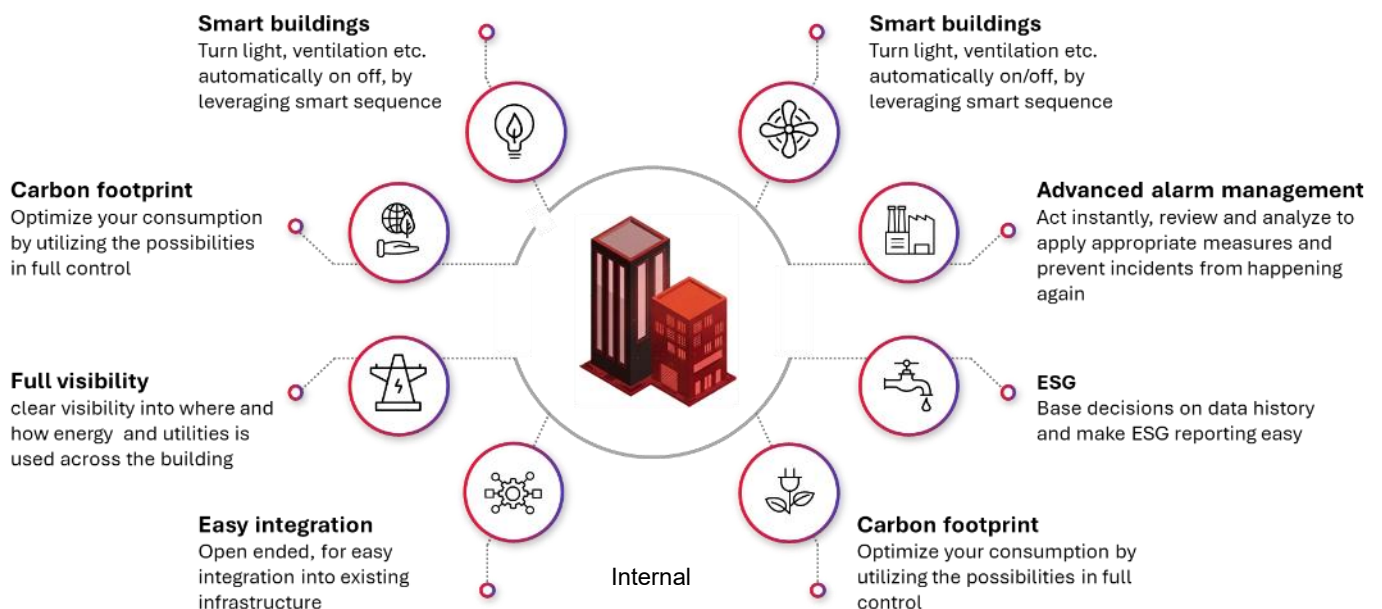

To provide an open, flexible, and integrated building, hospital and laboratory system for companies looking to optimize their facilities and unlock the full potential of their data through intelligent monitoring and control. PROCEMS gives you a competitive edge.

PROCEMS is an open-ended solution for monitoring and controlling even the most advanced and complex facilities and plants, by offering:

- **Automation** – Enhance building intelligence through automatic responses to operational events and changing conditions
- **Energy efficiency** – Reduce your carbon footprint and operating cost, through the intelligent control & optimization.
- **Data driven operations** – Optimize indoor climate and energy consumption based on real usage patterns without compromising comfort.
- **Data management** – Efficiently manage supervision, monitoring, and control of facilities in one integrated system.
- **ESG Support** – Enable accurate ESG reporting by tracking utility consumption, HVAC performance and other operational data connected to PROCEMS
- **Open and future-proof** – Seamlessly integrate with other systems, including planning, administration and maintenance platforms.

Open ended and future-proof, PROCEMS meets your needs today and in the future

Key strategic benefits

Open-ended architecture

- Functionality can be tailored to user specific needs
- Supports both phased and targeted investment approaches
- Co-existence with existing solutions

Graphical user interface

- Object-oriented graphical user interface adaptable to individual needs
- High usability and intuitive design improve productivity

Modular

- Flexible system configuration to match user requirements
- Free distribution of software modules to multiple workstations

Scalable & flexible

- Built on standard platforms and widely recognized communication protocols
- Seamless integration to a wide variety of Third-party products and systems
- Reduced lifecycle costs
- Low dependency on specific suppliers or vendors

Reliable & robust

- Proven technology ensures high system reliability
- Distributed architecture segregates impact of unit failure
- Minimized risk through industry-wide acceptance, openness, and long-term support

Your gateway to energy savings, utility optimization and smart building control

Get in touch and learn more about how you can leverage PROCEMS to reach your strategic goals.
