Mission-Critical

CGI

We are a true IT Systems Integrator

We work tirelessly to advise, build and operate bespoke, technically complex, sovereign mission-critical information systems which help our clients keep us all safe and secure.

We bring innovation to our clients using proven and emerging technologies, agile delivery processes and our deep expertise across the breadth of space, defence, intelligence, aerospace and maritime, all underpinned by our end-to-end cyber capability.

CGI

Delivering mission-critical IT systems for complex environments

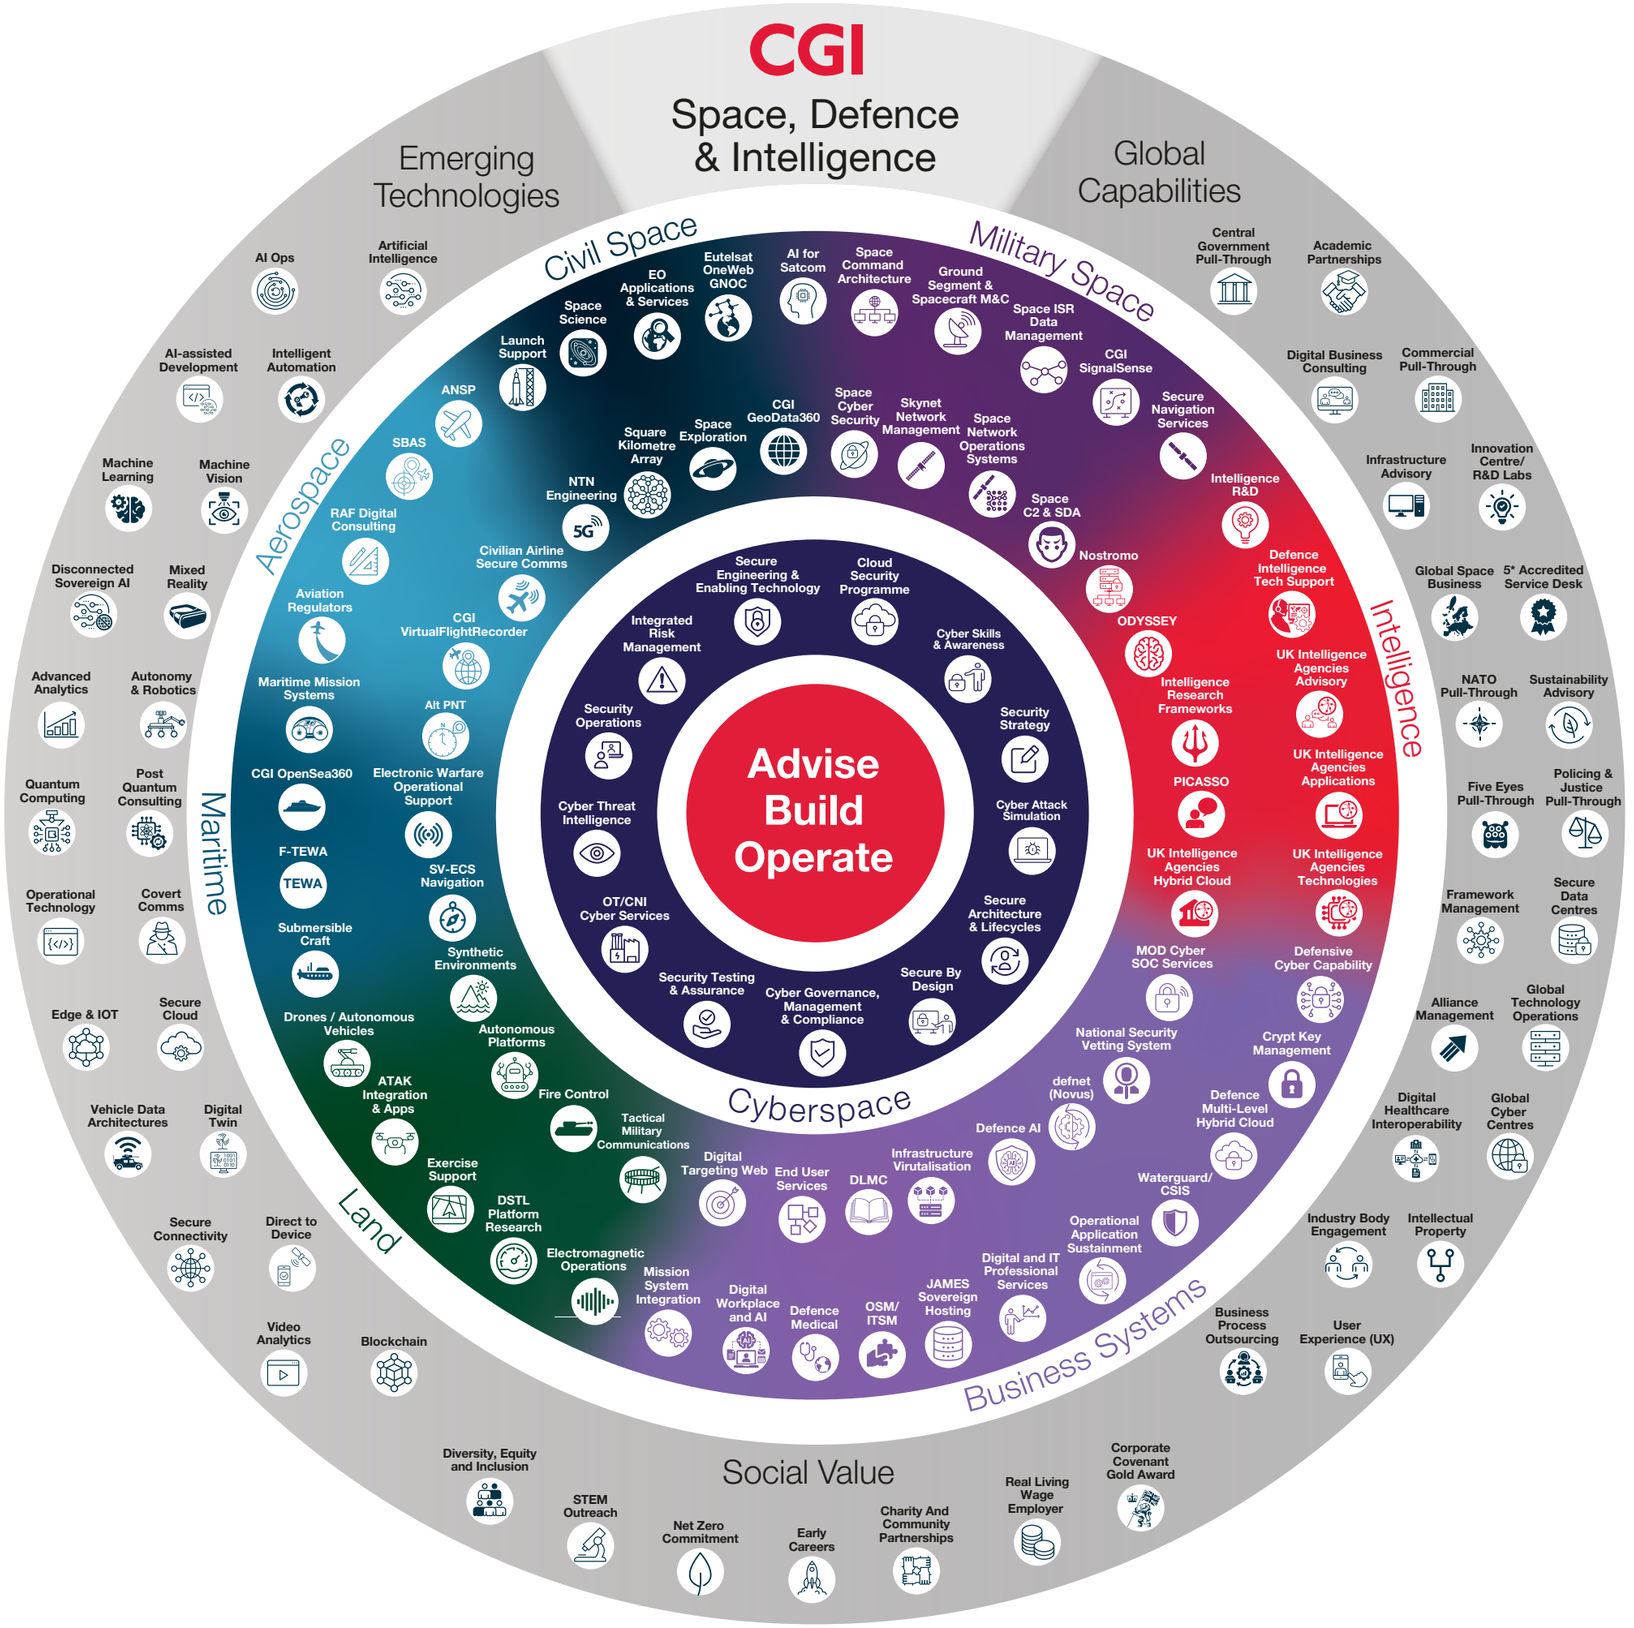

Trusted alliances and SME partnerships

Our collaborative approach ensures that every innovation delivers measurable value - helping our clients stay agile, connected and prepared for what comes next. We work collaboratively with global technology companies, cutting edge SMEs and academia to deliver the optimal solution for each client.

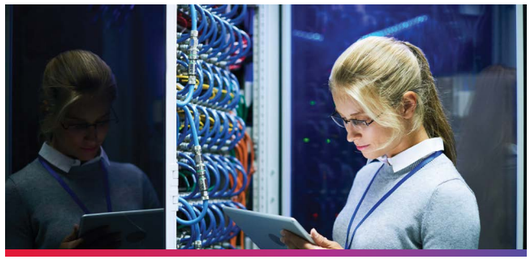

Collaborating with allies. Securing shared missions

CGI delivers defence expertise across allied nations, with long-standing partnerships spanning NATO, the Five Eyes community and AUKUS. By working in close proximity with our clients, we build the trust and understanding needed to achieve true interoperability.

Accelerating digital advantage across domains

Cyberspace
Your mission protected.

Resilient operations, driven by seamless cyber security services, protecting your success and operations. We deliver a multi-layered cyber security approach designed to keep your vital assets and data safe.

Civil Space
Secure, mission-critical solutions.

We help clients implement complex, space software systems to meet fast-changing market demands. We design resilient, secure solutions that enable assured communications and operations across the full space ecosystem from space to ground to user. Our expertise spans satcoms, data exploitation, command and control, on-board software, and ground segment engineering.

Maritime
Data advantage for maritime operations.

Secure, trusted and resilient data underpins modern maritime operations. We support coherent, integrated mission systems that deliver sustained operational advantage.

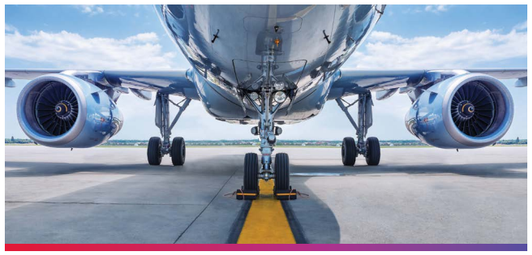

Business Systems
Transforming defence information services.

We help clients to connect systems, data and people, turning complexity into clarity and information into operational advantage. Our systems underpin defence corporate services from healthcare to vetting systems.

Military Space
Protecting the space domain.

We deliver secure, mission-critical capabilities for defence clients, spanning communications, navigation, surveillance, space situational awareness, ground segment operations, data processing, and protection of sovereign space-based assets. Our systems enhance resilience and mission assurance across the contested space domain.

Aerospace
Digitising civilian and military aerospace.

We provide safety-critical systems design, integration, software, secure digitisation and data optimisation for both civilian and military aerospace clients meeting operational needs across flight systems, air traffic, and command & control.

Land
Delivering secure interoperability.

Timely, accurate and coherent information is critical to today's military operations, helping commanders understand their operating environment. We deliver digitisation and platform management systems that ensure the right information is in the right hands at the right time.

Intelligence
Advancing secure digitisation to achieve results.

Our sovereign teams support intelligence clients to deliver secure, complex, large-scale programmes to help protect the UK's national security.

Supporting our Armed Forces

ARMED FORCES COVENANT
EMPLOYER RECOGNITION SCHEME
GOLD AWARD

We're a forces-friendly organisation

CGI is proud to uphold the Armed Forces Covenant and support the armed forces community. We recognise the contribution that service personnel both regular and reservist, veterans and military families make to our organisation, our community and to the country.

About CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-focused to help accelerate returns on your investments.
