

Aviation Security

We help you to achieve a high return on your security investment in terms of time, money and manpower. We give you the confidence to secure your information and services and to protect your staff, customers and shareholders from criminal attacks.

THE CHALLENGE

How can you ensure the physical safety of your passengers and protect their personal and financial data? With more and more travelers using self-service, they need secure access to your services. Breaches of passenger information could result in fraud and burglaries when people are away on vacation or business, the targeting of high profile individuals and wider identity theft.

Ensuring that planes are secure involves a complex blend of flight planning, maintenance, scheduling, crew allocation and training. Countering terrorism goes deeper than the visible checks at the airport. It involves behind-the-scenes security processes (often underpinned by technology) that regulate the activities of employees and third-party service staff involved with the average flight.

The right security can give you confidence against any threat.

THE CGI ADVANTAGE

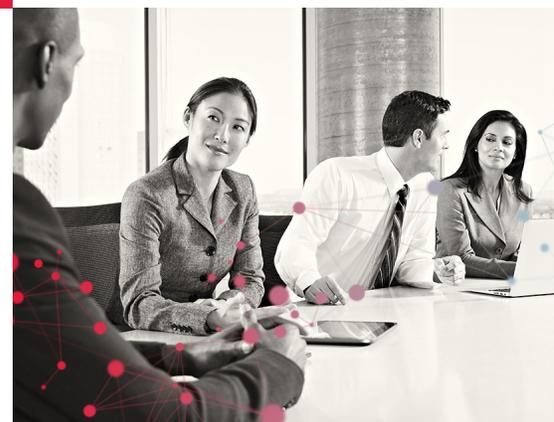

Whether you need a completely new system or a solution that makes your existing systems secure, we work with you to understand your business objectives, risks, policies and standards. We then recommend, design, build, integrate and run what you need—a unified access system that protects your organization, partners and customers, even after mergers or acquisitions. We secure your future. Immigration authorities, airlines and airport operators trust our innovative solutions to achieve the following:

Protect your knowledge

We will work with your people and processes and innovatively use technology to create an agile, secure, compliant operation. We ensure no one can spy on, sabotage or steal your ideas or sensitive information.

Protect your people

Our security approaches ease your workload and make sure vital services always run without disruption from vandalism or crime. Your people stay safe, work becomes more efficient, and you get better results with fewer resources.

FACT SHEET

Read more about how we've successfully improved the effectiveness of our clients security operations.

Automatic gate check-in for Lufthansa

Our automated gate check-in and reconciliation system ensure the right passengers are directed to the right gate for the right Lufthansa flight. This is key to managing passenger security.

PCI DSS at Lufthansa

CGI audited Lufthansa's Payment Card Industry Data Security Standard (PCI DSS) to ensure passenger's payment information is protected.

Physical security at Gatwick Airport

CGI improved the quality and efficiency of Gatwick's Airport mobile security guards through optimizing routes and patrols. We used PDAs with RFID readers and RFID tags via GPRS to enhance security for both the airport and the airlines flying via Gatwick.

Protect your brand

We work with you to protect and strengthen your reputation when it comes to security. CGI is a name people know and trust.

Protect your future

Confidence through security is at the core of the 21st century organization. We advise on, design, build, test and operate the right security environment for you—adding to your current systems, designing new ones or building mobile apps in the cloud.

Protect your profits

Partners, suppliers, customers and citizens want access to your information in the real world and online. We can help you make sure that only the right people have access through a safe and secure experience.

OUR APPROACH

We help you protect your information, your assets and the public in two key ways.

Organizational security

Every part of your business should be secure. We can help you achieve the following:

- Control access to information, systems and operational areas
- Teach your team about risks, processes and legal compliance
- Use tools to avoid data loss and create new secure customer opportunities
- Work securely with global partners (in the cloud, mobile or offshore spaces)

Protection of people and assets

We'll help you protect people and ensure that vital services like energy and telecoms run without disruption from physical or electronic crime. In other words, we quickly identify and mitigate threats to people or assets from outside or inside.

WHY CGI?

- We are a service provider to 4 of the top 5 major global carriers, as well as 5 of the top 10 airports in Europe.
- We have decades of experience supporting the aviation industry, with first-hand knowledge of airline operations and airports, regulators, and aviation services.
- We understand secure payments and have played a key role in the specification of payment standards such as SWIFT and SEPA. We are a trusted payment systems supplier to many of the world's largest commercial banks and work with a number of clients within the anti-fraud and money laundering sectors.

ABOUT CGI

With 69,000 professionals operating in 400 offices in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.
