

Chemical Regulatory Compliance Management

End-to-end capabilities for global compliance and holistic product stewardship contributing to your environmental, social, and governance initiatives

Advisory services

Expertise across the complete spectrum of product stewardship and chemical regulatory compliance.

Environmental, Health, and Safety compliance audits

Identify areas of risk before they are identified by the local regulatory authority, reducing exposure and improving workplace safety throughout the organization.

Mergers, acquisitions, and divestitures

Get an independent assessment of product portfolios and compliance programs for acquisition targets as part of due diligence to avoid costly surprises after the deal is closed. Benefit from product portfolio and business integration services once the acquisition is complete.

IT portfolio optimization

Maximize your existing investment in IT solutions and improve your compliance posture through our combined IT and product stewardship domain expertise. Exploit our wealth of expertise and experience to tie together existing platforms and architect cost-effective and scalable operations necessary to keep pace in today's global regulatory climate.

ProSteward360

A state-of-the-art hazard communication and chemical management software platform fully aligned with all country adoptions of Global Harmonized System of Classification and Labeling of Chemicals.

Ongoing BPS

Highly trained resources providing fully managed or supplemental IT and business process services (BPS) for flexible, demand-based support.

- Hazard communication
- Vendor SDS management
- System administration
- Hosting
- Application implementation and upgrade

Safety Data Sheet/eSDS authoring

Manage regulatory information with rules-based chemical data management and SDS authoring in accordance with regulations in 150+ countries and 50 languages including EU poison control notifications.

Exposure scenario management

Efficiently store and manage the use, exposure scenario and risk management measure information for REACH and CLP compliance.

Vendor SDS management

Store and maintain a central repository of vendor and company authored SDSs for tailored employee access aligned with region and language requirements.

Chemical inventory and workplace safety

Get one-stop access to critical information regarding Employee Right to Know, site-level authorized material use lists and chemical inventory used to generate ready-for-submission regulatory reports such as SARA 311/312. Conduct risk assessments such as COSHH and chemical approvals through intuitive workflows resulting in records for reference and further reporting.

Reporting and ERP integration

Flexible integration engine to flow data to third-party EHS systems or support additional business requirements such as volume tracking, chemical safety assessments, EHS data access, and report generation.

Why CGI?

CGI has 30+ years of experience partnering with leading commercial and public sector organizations to implement effective EHS information management strategies and solutions that improve our clients' compliance postures and reduce costs. We have extensive experience helping companies tackle the business and technical challenges associated with regulatory changes around the globe.
