

EHS Regulatory Advisory Services

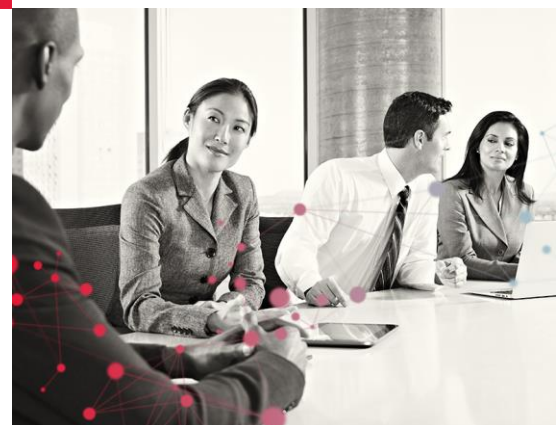

As the focus on product stewardship, consumer safety and associated compliance demands continues to increase around the globe, CGI's EHS Regulatory Advisory Services can help companies stay ahead of change.

Businesses are faced with extraordinary challenges in complying with expanding regulations, keeping pace with industry initiatives, tracking country variations and responding to rising public attention around product stewardship and sustainability. Meeting increasingly complex requirements while remaining agile to support evolving business strategies requires experienced resources, efficient processes and flexible IT solutions. CGI's regulatory advisory services and software solutions help organizations meet these challenges.

IMPROVING RESULTS, REDUCING IN-HOUSE BURDENS

Sound product stewardship begins with understanding how legal obligations affect your product portfolio and being able to monitor, measure and track alignment and facilitate continuous improvement. CGI can relieve the burden on your internal resources for these activities by providing:

- **EHS Compliance Audits:** Focusing on specific areas or regulatory programs, CGI experts conduct thorough reviews of the documentation, systems and processes aligned with your company's current regulatory requirements. The audit findings highlight risk factors and improvement opportunities *before* they are identified by regulatory authorities.
- **Compliance and Change Management:** CGI regulatory consultants and industry-leading business process management solutions work together to effectively monitor and optimize operational and organizational changes and promote continuous improvement.
- **Mergers, Acquisitions and Divestitures:** Companies need to be sure their acquisition targets have sound compliance postures before deals are closed to avoid significant risk and cost after the fact. CGI offers independent and objective assessments of a target company's compliance program prior to acquisition, and can help with integration post-purchase.
- **Supply Chain Support:** Inventory status determination, substance or product registrations, and variable EHS requirements around the world challenge even the most diverse organizations. CGI's global network of in-house experts and partner companies can help you maximize value and establish sustainable competitive advantage by supporting your suppliers' and customers' regulatory obligations.

THE CGI WAY

CGI has developed an innovative, flexible and personal approach to providing services. We structure each relationship to meet our client's unique business goals and build in flexibility to meet current and future needs.

CGI employs a compelling global delivery model that facilitates the delivery of cost-effective IT solutions. Clients choose from a palette of offerings to create the onsite, offsite, nearshore and offshore combination that gives them the savings, efficiencies and control that they want.

- **Ongoing Business Process Services:** Our team of certified SDS Authoring and Dangerous Goods specialists provide outcomes-based regulatory services that adjust to fluctuating demands and allow limited client resources to focus on mission-critical business objectives.

INFORMATION TECHNOLOGY PORTFOLIO OPTIMIZATION

Maintaining a consistent and forward-looking compliance posture requires the use of multiple EHS and business IT solutions, seamlessly integrated and serving a global workforce. Regardless of maturity level, the IT ecosystem often represents the most significant company investment. When fully leveraged, it can provide the greatest savings associated with compliance activities. CGI has the tools, processes and expertise to help you evaluate your EHS IT landscape, make the most of your current investments, and identify and address the areas of largest risk to your organization.

EXPERT TRAINING SERVICES

CGI provides training sessions to educate organizations on upcoming regulatory changes and actions required for compliance, as well as to train new employees on current regulatory requirements. We also help organizations prepare and implement guidelines, policies and procedures aligned with regulatory changes. Topics include REACH, GHS and international hazard communication requirements aligned by country or region. Courses are held regularly and can be taught onsite at your organization. Have a topic in mind? Material can be customized to meet your specific needs.

EHS EXPERIENCE AND EXPERTISE

CGI has more than 20 years of experience partnering with leading commercial and public sector organizations to implement effective EHS information management strategies and solutions that improve our clients' compliance postures and bottom lines. We have extensive experience helping companies tackle the business and technical challenges associated with regulatory changes including REACH and GHS around the globe.

CGI's team of regulatory consultants, toxicologists, hazard communication specialists and chemists includes a combined 200+ years' of experience providing chemical regulatory consulting and business process services to help clients stay ahead of some of most significant changes the regulatory landscape has seen in decades. Leverage our wealth of expertise to architect the scalable, efficient and cost-effective operations you need to keep pace in this global regulatory climate.
