CGI Cloud Solutions For Government

CGI

CGI has built an end-to-end cloud solution designed to specifically meet the needs of federal agencies and deliver a single-point of accountability.

As Federal agencies increasingly turn to the cloud to reduce capital expenditures, increase operational efficiencies and accelerate the adoption of new services, they can rely on CGI—a proven cloud services provider to government and commercial enterprises around the globe.

Enabling Transformation of Federal Agencies

Whether your agency wants to pilot a public website in the cloud, move from a cumbersome enterprise-wide application hosting model to a SaaS or IaaS model or transition its entire portfolio of applications from disparate data centers to a private or commercial cloud solution, CGI has the expertise and know-how to help agencies accomplish these objectives in a cost effective manner.

As an IT and business consulting services firm supporting federal agencies for 40 years and a provider of cloud services for more than 20 years, CGI has demonstrated its ability to provide value-added services such as application portfolio cloud readiness assessment, transition management and security services.

Early Innovator for FedRAMP Authorized Cloud Providers

CGI Federal was the first large cloud services provider to earn a FedRAMP Provisional Authority to Operate (P-ATO and DISA P-ATO) for our U.S. federal government IaaS community cloud, assuring agencies that CGI's cloud provides them the latest security controls and continuous monitoring to help secure critical IT assets.

CGI built the federal community cloud from the ground up to meet the enhanced security requirements of our federal agency customers under the guidance of NIST 800-53 and FedRAMP. Architected using open standards to promote interoperability with reusable services to save agencies even more expenditure. CGI's approach to cloud is different: it

CGI Federal Key Facts

- Over 200 Cloud Service subject matter experts in key locations across the U.S.
- More than 27 federal agencies have adopted CGI's Unify360 Hybrid IT Cloud Management Platform solution
- One of only 12 awardees under the DOI FCHS GWAC authorized to provide the government with a reliable, scalable, highly available, cost-effective and secure Cloud computing solution
- Continental United States (CONUS) data centers staffed by U.S. citizens

CGI Unify360

is focused on services that enable the IT mission, not merely commodity servers and storage.

CGI Federal Cloud Key Features

- Flexible, secure infrastructure designed and built for federal agencies
- FedRAMP Joint Authorization Board and DISA authority to operate
- Predictable, sustainable savings up to 50%
- Automated service management for efficiency, transparency and control
- On-demand flexibility to design and scale as needed
- Certification for highest security workloads
- High-touch, customer-centric service model with global presence
- Business-centric analysis and transition planning
- Secure portal for automated cloud service management

Managing Your Future State Portfolio in Hybrid Clouds

CGI's cloud solutions are focused on a broad set of services and solutions leveraging the optimal cloud service to meet business and mission needs. We don't merely "lift and shift"—we enable the entire IT mission across multiple cloud providers.

CGI delivers centralized, simplified, highly secure and fully managed solutions. We offer CGI Unify360™ as a unified platform for brokering, governing and operating cloud solutions. As a major cloud provider and industry-leading government systems integrator, we offer a complete cloud portfolio with the ease of single-point accountability.

Unified Hybrid IT Managed Services

CGI's mature and proven managed security services incorporates our state-of-the-art technology for a turnkey hybrid IT management solution. At CGI, we take the business of managed services seriously and offer a "best-fit" approach. We provide end-to-end services that monitor all aspects of your infrastructure with a single system—the CGI Unify360 Platform—to proactively identify areas for enhanced efficiency and deliver expected results. Whether your organization needs a Help/Service Desk, Managed Security Services (NOC/SOC) or Hybrid Infrastructure services, CGI offers flexible tools and managed services for both on-premises and cloud-based infrastructure services.
