

# CGI Secure Enterprise File Sync and Share

**A**cross today's organizations, employees are creating and sharing more data than ever before, but this information exchange no longer takes place solely on an organization's IT assets. The CGI Secure Enterprise File Sync and Share provides secure file synchronization and sharing, improving productivity and collaboration across your entire organization.

## THE FILE SYNCHRONIZATION AND SHARING DILEMMA

New devices, cloud access and a wide world of new applications are empowering users to innovate with information. However, this productivity oftentimes comes at the expense of maintaining good stewardship over the data they use. Rogue applications and unsanctioned services can compromise the security of your organization's data. Rather than implementing further controls that limit productivity, start delivering these types of services your way with CGI Secure Enterprise File Sync and Share.

## THE SOLUTION: SECURE ENTERPRISE FILE SYNC AND SHARE

While these problems are complex and far-reaching, the solution is simple. CGI Secure Enterprise File Sync and Share is a fully integrated solution for safe, secure file sharing and synchronization and is enterprise and Internet ready, making it one of the most secure sync-and-share collaboration solutions. The software uses CGI object store to store, protect, share, sync, secure and manage data in the an efficient, scalable and highest-density private cloud platform.

End users simply save a file to their CGI "Anywhere" folder and it will automatically synchronize to all of their registered devices and be available via popular Web browsers. Once saved to the CGI Anywhere folder, the file is protected, compressed, single-instanced, encrypted, replicated and access-controlled. Individual files or entire folders can then be shared with a simple hyperlink.

With CGI Secure Enterprise File Sync and Share:

- Individuals can sync their work files to multiple devices and store them with access-controlled links which can be set to expire;
- Simplified administration with built-in mobile device management, auditing and full integration with Microsoft Active Directory®;
- All stored files are deduplicated, compressed and backup-free in an object store;

## FACT SHEET

### CGI SECURE ENTERPRISE FILE SYNC AND SHARE

- Share content inside and outside the organization
- Deliver better security and protection of data
- Retain proper stewardship and control of data
- Eliminate unnecessary copying of data

- Organizations can reduce email storage and network payloads by sending links to files and folders instead of multiple attachments;
- File sync and share is easy to deploy and manage;
- No end user training required;
- Works with existing IT practices and processes;
- No backups needed;
- Includes a user self-service portal.

## SECURE

With CGI Secure Enterprise File Sync and Share, you can avoid the risks of public consumer clouds and turning over control, security and protection to others. Retain proper stewardship and governance of data and reduce the risk of noncompliance or compromising intellectual property.

- Enterprise scale, protection, security and reliability
- Active Directory and virus scan integration
- Encryption under your control
- Optional two-factor authentication for shared links
- Remote wipe of data on lost, stolen and retired devices
- Lock code enforcement

## SIMPLE

Improve productivity and empower mobile workers when you enable employees to sync their content across various devices and share content with those inside and outside the organization. Avoid worrying about mailbox sizes, struggling with file size limits in content management systems, over-replicating data or even physically shipping DVDs or USB drives. Simply share a link instead of spawning multiple copies.

- Compatible with existing IT practices and policies
- Available in English, Simplified Chinese, Korean, Canadian French and Japanese
- No need to connect to a virtual private network
- Files and folders shared via links
- Intuitive user interface: no end user training required

## SMART

Data is stored in CGI object storage and does not need additional backup. By storing all their files in CGI Secure Enterprise File Sync and Share, employees never have to worry about backup and restore. Older versions can be easily recovered, and if a user device fails, administrators can take the following steps to bring the data back: buy a new device, connect to the Internet, and install the appropriate app for the device.

Since files are shared as a URL, there are far fewer attachments moving through email, the network and user devices. Also, with compression and

## ABOUT CGI
