CGI Regulatory and Statistical Reporting

Complying with reporting requirements can be time-consuming and costly. The more lines of business and agency oversight you have, the greater the burden on your staff and resources. Save time and money by letting CGI take the burden of regulatory and statistical reporting off your hands.

CGI's Regulatory and Statistical Reporting Services offer an easy, cost-effective alternative. By allowing CGI to handle all facets of your reporting, you can concentrate on more strategic activities that grow your business.

OUR SOLUTION AND TEAM MAKE THE DIFFERENCE

CGI's services are supported by our proven STATS system, which has been designed specifically to meet the statistical and regulatory reporting requirements of the property and casualty industry. The STATS system formats data into statistical agent-required codes and records layouts for balancing, editing and transmitting. CGI manages the entire process—from receiving data to submitting the report to the agent. CGI also can handle error processing on your behalf.

CGI's statistical reporting team includes dedicated experts in stat agent requirements. These experts analyze data thoroughly to ensure the correct format and codes for each agent and work with you to proactively resolve errors and prevent fines and fees. Averaging more than 25 years of experience in insurance and stat reporting, they also offer suggestions for continually improving the process, validating the accuracy of statistical submissions and ensuring full regulatory compliance. Because our staff members also serve on stat agent technical advisory committees, CGI and our clients have a voice in reporting requirements and get advanced knowledge of potential changes in the industry.

CGI's Regulatory and Statistical Reporting Services have built a solid foundation of partnership and trust with our clients. Our flexible approach and deep experience enable us to take challenging problems off your hands.

A POWERFUL COMBINATION OF AUTOMATION AND EXPERTISE

Using our sophisticated STATS system, CGI handles reporting for all states and lines of business, and all major stat agents, including state data calls.

Our reporting staff averages 25+ years of insurance experience and includes industry experts in stat reporting.

KEY STAT AGENTS OFFERED

- American Association of Insurance Services (AAIS)

BENEFITS OF OUR SERVICES

At CGI, we understand the insurance industry and the challenges of statistical and regulatory reporting. As a company committed to the insurance sector, we believe in developing and implementing the most sensible, cost-effective solutions for our clients. Our Regulatory and Statistical Reporting Services are a great example of how we find ways to help clients save time and money, while avoiding frustration, with a unique combination of automation and people.

Our services deliver a variety of benefits, including:

- Reliable, dependable, on-time reporting
- Short implementation period with an experienced team
- Proven insurance software and service levels
- Expert circular and bulletin review
- Capacity to handle all facets of statistical reporting.

A FULL RANGE OF SERVICES TO MEET ALL OF YOUR NEEDS

Our services have been specifically designed to handle all of your reporting needs:

- As part of maintaining our STATS system, our staff proactively reviews and implements pertinent changes from all relevant circulars or bulletins.
- We provide assistance for any statistical reporting issues, including direct interaction with stat agents if needed to ensure compliance.
- We manage processing for all personal and commercial lines of business for all states, including running our STATS system and the appropriate pre-edit packages to ensure an accurate record layout and code compliance.
- We handle balancing of premium and loss amounts.
- Our team's review helps eliminate errors discovered during processing to ensure submission acceptance, thus reducing or eliminating fines.
- We handle electronic data submission to ensure timely compliance, as well as retention of statistical submission data files and reports.

CGI reports data to various departments of insurance, including, but not limited to, the following:

- IDI (Illinois Cost Containment)
- Mass CAR (Commonwealth Auto Reinsurance)
- California Reporting [CSS (Community Service Statement), SAL (Auto Liability), SAP (Auto Physical Damage)]
- Florida Reporting (Hurricane Cat Fund)
- Automobile Liability Insurance Reporting via ISO/Verisk CV-ALIR

ABOUT CGI

Founded in 1976, CGI is one of the the largest IT and business process service providers in the world with approximately 70,000 professionals. We help clients transform into customer-centric digital enterprises through high-end business and IT consulting, systems integration and transformational outsourcing services.

We combine this with a client proximity and best-fit global delivery model. Our 40+ years of insurance experience includes policy, claims, and billing implementations across the globe. With the development of innovative solutions such as Ratabase[®], the industry's leading rating and product configuration software, and the annual processing of millions of information product transactions, we manage billions in premiums through our systems.

Our high-quality business consulting, systems integration and managed services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results.

As a demonstration of our commitment, our client satisfaction score consistently measures higher than 9 out of 10.
