Momentum Acquisitions Overview

Driven by the needs and desires of federal acquisition professionals

CGI designed a commercial off-the-shelf (COTS) system specifically for you—**acquisition leaders, contracting officers, contract managers and administrators**. We've transformed your ideas and desires into a comprehensive, full-lifecycle, streamlined and configurable federal procurement solution.

CGI incorporated knowledge and insights from government acquisition professionals, giving you effective and reliably managed end-to-end federal contract writing and acquisitions management.

Our commitment to better federal procurement is intrinsic and secured by deep experience. Momentum and its distinctly successful history is the manifestation of our understanding of and commitment to your goals.

Through our work with numerous federal agencies and proven successful implementations of Momentum Acquisitions, we've evolved the solution into a best-of-breed dynamic system housing the key components for your success.

Momentum Acquisitions is out-of-the-box ready to meet your needs, and highly configurable to provide a tailored federal procurement solution for complex requirements.

Business drivers

Addressing key needs with technical know-how

CGI Federal's clients have identified transformative changes needed to bring complex federal procurement forward. Business and IT leaders are aligned on the top business priorities to increase agency savings and evolve the acquisitions process.

The opportunity

Successful federal procurement combines a customer-centric culture with the pursuit of operational excellence. The Momentum Acquisitions solution enables agencies to:

• Operate an efficient contracting process

• Eliminate disparate systems requiring duplicate data entry

• Foster an environment to meet agency and personnel procurement goals

• Effectively track and monitor diverse procurement workloads

• Foster collaboration between acquisition professionals

• Synchronize financial and procurement systems to improve audit outcomes

Our clients' top acquisition priorities

• Improved insight into all procurement activity

• Streamlined procurement process utilizing innovative and automated practices

• Enforced standards and procedures to buy smarter and reduce cost

• Compliant with FAR/DFARS and other federal procurement regulations

• Effective procurement strategy collaboration both internal and external to the organization

• Continual analysis and improvement of the procurement process to mitigate contractual risks

Momentum Acquisitions strategy

CGI's approach

Our methodology comes from decades of experience implementing our reliable and scalable back office systems to deliver cost and time savings.

Its high-level principles are:

Collaboration: understanding and bridging the business domain and the technical side of procurement data and integrated systems

Evolutionary approach: pursuing innovation while leveraging existing investments

Customer and user experience: recognizing that people will adopt what they can easily use and what brings them value

Agility: being highly adaptive to changing legislative environment and needs

An effective acquisitions process draws upon the multiple dimensions of people, process, data, analytics and technical innovation. CGI's approach to the design and implementation of Momentum Acquisitions uses collaborative expertise in each of these areas to achieve a comprehensive solution for our federal agency partners.

We offer a proven, secure, complete and configurable COTS acquisition software suite that manages procurements end-to-end. Supplementing your processes, Momentum Acquisitions provides **in-tool guidance, document generation and streamlined workflow.**

How we work together

CGI collaborates with you before, during and after a Momentum Acquisitions implementation.

Our approach balances customer demand-driven agility at the front end with the need for integration, compliance and security at the back end.

Through our Momentum User Group, we provide a forum for bringing insight and practical experience to promote ongoing and meaningful dialogue between the business, operations and IT.

Momentum Acquisitions core components

A functional overview

Acquisition planning

This component provides dynamic tools for team collaboration, scheduling and assignment, adaptable to real world changes. It powers the acquisition planning process, resulting in the ability to capture more effective, economical and timely acquisition plans. Agencies benefit from an enhanced acquisition planning and full traceability throughout the acquisition lifecycle.

Requisitioning

The Requisitioning component allows users to receive, assign and finalize a requisition package, perform funds validation and record commitment activity.

Solicitation

The solicitation component enables federal contracting professionals the ability to create solicitations in accordance with the Federal Acquisition Regulation (FAR), Defense Federal Acquisition Regulation Supplement (DFARS), and other regulatory guidance. The solution supports simple to complex procurements which incorporate CLINs/SLINs/ELINs, delivery requirements, evaluation criteria and attachments. An out-of-the box, rules-driven clause engine recommends clauses, providing an efficient means for identifying and adding clauses and provisions to solicitations. Solicitations are generated on federal standard forms, or agency specific forms maintained through configuration.

Source selection

This component supports electronic submission of vendor proposals, representations, certifications and clause fill-ins through a vendor portal that transmits automatically and routes to the procurement manager to initiate the evaluation process. Proposal information is easily tracked through the review process. Users can assign tasks to evaluators and use embedded tools to facilitate the completion of scoring and award.

Award

This component supports all contract types and the purchase card. It also streamlines generation of the award by pulling pricing information from the proposal and information from the solicitation, reducing data entry. The award process builds on CLINs/SLINs/ELINs established during the purchase request and solicitation phases and allows for complex pricing structures including options, fees and quantity price breaks. Commodities and services are both equally supported and can be tracked.

Contract administration

Throughout the life of a contract, procurement personnel have the ability to initiate unilateral or bilateral contract modifications and also leverage mass modification and concurrent modification functionality to more efficiently complete contractual changes. Post-award administration tasks are supported through robust task management and querying capabilities. Contract data can be aggregated in numerous ways to provide a bird's eye view of the state of your agency's contracts to ensure that defined procurement goals are met.

Contract closeout

Business rules can be configured to automatically identify those contracts that are considered physically complete, to better facilitate the closeout process. The contract closeout entity provides a mechanism to document the close-out process including a FAR-based closeout checklist, tracking of key information such as retention periods and generation of a closeout completion statement.

Paperless processing

A central contract file manages the entire procurement cycle, provides a single online repository of the contract and supporting documentation, tracks contract status and performance, and supports collaboration among procurement officials. In addition, the contract file also serves as a centralized workspace where users can initiate contract actions, execute on-line queries and establish and manage tasks and milestones from request through contract closeout and archiving.

Next-generation acquisitions now

Why Momentum Acquisitions?

It is full-featured: With support for all stages of the procurement lifecycle, customization is most often eliminated or occurs minimally.

It is out-of-the-box ready: A COTS solution capable of supporting all contract file documentation

It is designed for you: Built exclusively for the federal government acquisition professional

It is proven: In operation in all three branches of the federal government

Why CGI & Momentum Acquisition?

Experience. Value.

- Built for you: We created Momentum Acquisitions specifically for our federal clients.

- Proven: With a track record of 100% on-time implementation and a portfolio of meeting 90% of our clients' needs without customization, Momentum Acquisitions is the low-risk, full lifecycle procurement solution for agencies of any size.

- Secure: With multiple customers in the intelligence community and several worldwide implementations, Momentum is continuously vetted by a thorough vulnerability testing process.

- Accountable: CGI's government procurement expertise and the Momentum Acquisitions suite provide clients with a full-service solution and single-point, direct accountability and ownership of all implementation components.

- Adaptive: Momentum Acquisitions' continuous adaptability supports complex procurement processes. With more than 75% of our software's content coming directly from federal clients and regulation updates, CGI is committed to client-driven innovation and soliciting feedback from our government-run user community.

What's missing from better federal procurement?
You are.

Join our ever-growing Momentum User Community

The government-run Momentum User Group (MUG) collaborates monthly to share best practices and shape the product's future direction. Your agency will benefit from Momentum's for-government, by-government philosophy.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments.

Nearly 7,000 of our experts help the U.S. federal government achieve comprehensive, scalable and sustainable IT and business goals. We enable our clients to execute digital transformation, build the federal workforce of the future, achieve operational excellence, enhance citizen engagement and protect America's assets. As the federal government faces unprecedented challenges, we remain committed to enabling its success, using our deep understanding of clients' goals and mission-essential needs to provide consultative insights and develop solutions for maximum results.
