

# CGI Ratabase

**P**olicy rating and product configuration are more than core insurance functions; they are critical to driving competitive advantage, revenue and long-term growth. Innovation and efficiency in the use of rating logic and the deployment of new products enable insurers to respond quickly to evolving market changes and move forward as market leaders.

CGI Ratabase is a comprehensive set of powerful rating and product configuration tools that transform rating and empower your business professionals to build, design and release competitive products in the fastest possible time.

## KEY FEATURES

- **Easy-to-use interface:** Intuitive Windows environment and interface
- **High interoperability:** Integration with any type of system, including policy administration, automated underwriting, agency management, web quoting, rate modeling and enterprise incentive management systems
- **Flexible rating architecture:** Enables rate tables and formulas to be developed once and then copied or shared across legal entities, lines of business, financial products and states
- **Powerful rating tools:** Quick developing, modifying and testing complex rating and rule methodologies
- **Stand-alone rating engine:** High performance and scalable rating engine (rated 3.8 million policies in one hour for one client)
- **Flexible product framework:** Supports the development of multiple products, including personal lines, commercial lines and specialty lines for both multi-variant and standard rating
- **Flexible product deployment:** Support for the deployment of insurance products on a variety of platforms
- **Advanced product management:** Advanced versioning that supports the management of multiple product versions by channel, effective date or other criteria

## KEY BENEFITS

- **Design complex rating products:** Manage complex algorithms and design highly dynamic pricing models that use multi-dimensional rate plan analysis to improve pricing accuracy and drive product differentiation
- **Avoid costly IT projects:** Enable your business professionals to develop, manipulate and test business rules/algorithms with minimal IT support, simplifying and speeding up product updates (by as much as 80%) and saving costs

## CGI RATABASE

POWERFUL AND SIMPLIFIED  
RATING AND PRODUCT  
CONFIGURATION

CGI Ratabase is the industry's leading rating and product configuration software. Its proven functionality, scalability and flexible technology empower business users at more than 100 carriers to quickly deploy extremely complex rating programs and product segmentation in a fraction of the time and at fraction of the costs of other solutions. It has the largest client base of any externalized rating engine in the market.

- **Build once and distribute anywhere:** Build your insurance products one time and deploy them to different applications, on different platforms, and with different technologies to generate significant bottom-line savings
- **Ensure scalability and extensibility:** Benefit from the ability to increase users, support policies with a large number of rating items (e.g., vehicles, locations, class codes, coverages, etc.) and modify pricing rates and rules quickly and with minimal effort

## KEY DIFFERENTIATORS

- **100+ successful implementations:** Implemented at more than 100 carriers and across a broad spectrum of product lines in multiple lines of business
- **Large client base:** Largest client base of any stand-alone rating engine in the market
- **Industry recognition:** Highest ranking in Celent's report on P&C Stand-Alone Rating Systems
- **Superior support:** Ongoing support from a highly experienced Ratabase team
- **Exceptional quality:** 95% on time and within budget track record driven by an ISO 9001 certified delivery framework and industry best practices
- **Active user community:** Opportunities to provide input into product direction and network with other users

## WHY CGI?

CGI's capabilities and success in the P&C and life insurance sectors have made us the partner of choice for hundreds of insurers, brokers and agents around the world.
