## SDS Authoring Business Process as a Service (BPaaS)

Experience the commitment®

**A**chieving a predictable, sustainable and cost-effective chemical compliance model is possible with the help of comprehensive SDS authoring services from CGI.

Adoption of GHS and REACH regulations around the globe have brought chemical regulatory compliance into greater focus than ever. Keeping pace with regulatory requirements in the face of significant cost pressures and resource demands requires organizations to fundamentally re-evaluate how these demands are met.

CGI has the solutions, processes, resources and expertise to manage your chemical hazard communication operations. We help you deliver measurable and immediate improvements to quality, turnaround time and the bottom line.

### MANAGING ALL THE PIECES

Maintaining chemical compliance requires software, processes, resources and expertise. CGI's SDS Authoring Business Process as a Service (BPaaS) provides a scalable, outcome-based model to provide the right people, processes and systems at the right time to support the peaks and valleys of your compliance obligations. Our full-service offering includes:

- **CGI ProSteward360® software:** Compliant SDS documents are generated in pre-configured formats and languages to meet obligations in countries around the world using ProSteward360. This global, end-to-end hazard communication and regulatory compliance software suite supports some of the largest chemical and oil and gas companies in the world.
- **Expert resources:** Our experienced and dedicated staff of hazard communication professionals include experts in transportation, dangerous goods, toxicology and chemical classification.
- **Streamlined processes:** Our centralized request portal enables efficient submission of work requests and tracking through to completion.
- **Secure infrastructure:** CGI hosts the application server, database and software in our world-class data center to provide high availability, intrusion detection and prevention, and disaster recovery. With complete hosting and IT management from CGI, including all IT, system administration and overhead (e.g, security, backup, upgrades, redundancy, etc.), you eliminate these costs and risks.
- **Outcome-based pricing:** Billing is aligned with completed requests, (e.g. an SDS) rather than effort expended, delivering increased transparency and measurable savings to your organization and business lines.

### TRUSTED EXPERTISE

- 20 years of experience with chemical compliance software, business process improvement and regulatory consulting
- Front-line involvement with the UN GHS subcommittee to review and update the UN Purple Book
- Team of dedicated authors averaging 7+ years of experience in hazard communication, including transportation classification and dangerous goods specialists
- More than 25,000 SDS documents authored to support clients in the build-up to 2015 compliance deadlines in the U.S. and EU
- Proven combination of software, processes and resources to reduce total compliance costs by 33% or more and allow clients to focus more on their core business

The combination of ProSteward360 software and streamlined business processes have allowed organizations to reduce total regulatory compliance costs by as much as 33%.

### **VISIBILITY THROUGHOUT THE PROCESS**

Whether submitting a single request or managing bulk updates associated with regulatory list updates, CGI's request portal allows you to submit your request, track the progress as the SDS is authored by our experienced staff, goes through an extensive quality assurance process, and is readied for your final approval in line with industry leading service levels and quality standards. Our SDS Authoring BPaaS is always ready to support your needs.

### **FLEXIBLE, SCALABLE AND MODULAR**

While CGI's SDS Authoring BPaaS is designed to manage all of the components of chemical regulatory compliance, if you are not looking to move to a completely outcome-based model at this time, CGI can tailor a solution to your needs using one or more components:

#### **SDS authoring services**

- Augment your team with experienced CGI authors to handle peaks such as approaching regulatory deadlines or expanding product lines or let CGI manage the peaks and valleys of your authoring needs.
- Use your own software or CGI's ProSteward360.

#### **ProSteward360 hazard compliance software**

- Software as a Service (SaaS)
- Hosted and managed by CGI at your facility or ours

#### **Regulatory consulting**

Unsure where your gaps are or how to improve your existing processes? Our world-class experts can provide regulatory consulting to help identify ways to improve your compliance processes or prepare for emerging regulatory requirements in the most comprehensive and cost-effective manner.

### **CGI'S EHS EXPERIENCE AND EXPERTISE**

CGI can help your company implement effective EHS information management strategies and solutions that improve your compliance posture and your bottom line. We have more than 20 years of experience partnering with global chemical manufacturing and oil and gas firms to tackle the business and technical challenges associated with global regulatory changes like REACH and GHS. We can help your company navigate these types of hurdles too.

#### **ABOUT CGI**

Founded in 1976, CGI is a global IT and business process services provider delivering high-quality business consulting, systems integration and managed services. With 65,000 professionals in 40 countries, CGI has an industry-leading track record of delivering 95% of projects on-time and on-budget, aligning our teams with clients' business strategies to achieve top-to-bottom line results.
