

CGI Sovera® Accounts Payable

Minimize accounts payable costs and improve cash flow.

Nearly every major business is challenged with managing accounts payable processes in a cost-effective and efficient manner. Drowning in paper invoices, accounting employees spend countless hours prioritizing, routing, processing and filing a sea of invoices generated from daily business activities. As organizations grow and change, managing the accounts payable process becomes more complex. Organizations must devote more resources to keep accounting departments adequately staffed to accommodate the workload.

Healthcare organizations are mired in manual processes, which often result in high costs, processing errors, lost information and delays. The physical routing of invoices also impedes organizations' ability to qualify for early payment discounts, eroding profits and subjecting them to collections that negatively affect their credit.

SOVERA OVERCOMES THE ACCOUNTS PAYABLE CHALLENGES

Through the smart implementation of technology solutions and enhanced business processes, organizations can streamline business processes by eliminating manual processing and data entry, which saves employee time, increases accuracy and improves the bottom line.

CGI offers such a solution. Sovera Accounts Payable integrates with existing ERP and accounting systems to help companies control, manage and share information within their accounts payable processes, reducing costs and enabling management and accounting staff to make better decisions faster.

Sovera Accounts Payable standardizes accounting processes throughout the organization. With out-of-the-box capabilities that provide rapid deployment, the manual routing and data entry of invoices is replaced by a web-based, automated system, enabling accounting personnel to process invoices quickly and easily. The solution also creates integrated reports and analytics, allowing organizations to review staff productivity and modify accounting processes as needed.

EXPERIENCE DELIVERING RESULTS

With extensive experience in implementing a suite of Sovera solutions, CGI knows how to help organizations maximize the power of ECM technologies and processes.

We also know the business of healthcare. Having provided services to manage more than 6.6 billion records used by 1,000+ health facilities, including 42 major health systems and 230+ hospitals, we have established the best practices needed to help healthcare organizations advance their goals.

Sovera Accounts Payable automatically captures, indexes, routes and stores invoices securely. A familiar interface allows system users to check invoice status and distribute them efficiently within the organization and to business partners. Delivering maximum business agility, Sovera Accounts Payable maximizes employee productivity by leveraging rules and reminders to automate daily invoice processing, ensuring that bills are paid on time and discounts are maximized.

ENABLING TECHNOLOGY

CGI's Sovera Accounts Payable solution is powered by IBM

P8 Content Manager (CM) with Business Process Manager (BPM), which automates, integrates and optimizes business processes. This technology unifies the entire accounts payable process by providing for maximum business agility, flexible work assignments and enforced deadlines to ensure the prompt completion of tasks.
