

Integrated Ship Management: optimized operational efficiency

Some of the largest and most complex shipping companies in the world trust their crew and operations management to CGI software. Developed specifically for the industry, the Integrated Ship Management service increases operational efficiency, creates better processes and improves accountability.

We understand the challenges that the management of ships poses today. Escalating prices of fuel, raw material and labor and increasing legislation forces businesses to look for ways to lower operational costs and improve supply chain efficiency. With continued globalization there is a demand for increased flexibility and this requires new levels of control.

CGI aims to bring greater control and efficiencies into ship management by integrating all processes into an intelligent service. Integrated Ship Management (ISM) from CGI enables quick responses to events and smooth functioning of the business.

WHAT IS INTEGRATED SHIP MANAGEMENT?

CGI's ISM service is underpinned by PearlChain's Navigator solution. This solution delivers the essential tools to build customized, integrated systems solution to fit our clients' unique business processes. The integrated service in maintenance, dispatch and invoicing, safety and compliance, HR and payroll, purchasing and inventory, and onboard give you unparalleled visibility throughout your organization and a level of data analysis that leads to:

- greater vessel and crew utilization;
- augmented business intelligence;
- reduced unplanned vessel downtime; and
- increased profitability.

EFFORTLESSLY DEAL WITH THE UPS AND DOWNS OF SHIP MANAGEMENT

In a business fraught with unforeseen conditions, this approach offers a way to rapidly deal with new circumstances, changing plans as required and allocating the right resources to the right place at the right time. The solution tackles the variable nature of the business, thereby freeing up resources to focus on managing and planning activities instead of trying to react to unforeseen events.

The success of CGI's ISM service lies in:

- Integration of all processes including ordering, logistics and financial operations.

FACTSHEET

INTEGRATED SHIP MANAGEMENT

Results

With Integrated Ship Management you can achieve:

- 80% direct savings in reporting
- 20% decrease in communications and stock on board
- Up to 25% savings through improved business performance
