

SAP practice and partnership

Experience the commitment®

Innovation and business value are at the heart of our work in delivering SAP solutions to clients worldwide. SAP implementations are not just about technology, but also about improving business process and performance to deliver results. Across industries, we partner with SAP to help clients streamline processes, by adding mobility in asset management, human resources and in the supply chain management. We help clients with leveraging cloud and big data solutions in order to cut costs and become more efficient.

CGI's SAP Practice is designed to meet the unique business needs of each client. We work with manufacturers to better run their plants; with governments to improve their services to constituents; with utilities to optimize their asset management; and with transportation and logistics companies to improve their supply chain and warehouse management. We offer a wide range of SAP-based solutions to address industry-specific challenges and position our clients ahead of the competition.

ABOUT CGI

With over 69,000 professionals in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.

KEY OFFERINGS

Our SAP implementation helps clients in a number of ways including streamlining processes, effectively managing assets and reducing costs are just some of the areas where, and we have developed some of the most innovative solutions to address client challenges. Our SAP key offerings encompass the following areas:

Enterprise Mobility: CGI is a full cycle service provider for Enterprise Mobility. We are able to support our customers with enterprise app's and with the integration of app's in the enterprise back office, making use of Mobile Enterprise Application Platforms (MEAP) software. We also provide Enterprise Mobility Management (EMM) solutions that make sure our customers stay in control, give the ability to distribute their own enterprise app's and get clear and consistent information about mobile (app) usage. We support and maintain mobile processes from our enterprise mobility delivery center and do so based on various Service Level Agreements and levels of support (gold, silver, bronze). Within the Enterprise Mobility domain we focus on Human Resource (HR), EAM, Mobility Warehouse Management as mobile solutions.

Enterprise Asset Management (EAM): The CGI EAM proposition helps companies to achieve world class asset management, streamline operations, reduce costs and strengthen their compliance with the support of the core SAP EAM product toolset linked to best of breed third party solutions.

Perfect Plant: Up to now, manufacturing remain with local solutions poorly integrated. White and blue collar collaboration is insufficient. With "Perfect Plant" we help overcome these constraints. Within the design, planning, execution and controlling loop, we also include the "real life" of shop floors, enabling industrial companies to deliver quicker, better products at lower costs. Our solutions integrate company apps and shop floor automation making the digital flow continuous up to the blue collar level. They are simple, easy to use and are mobile. Our projects are agile; the return on investment is achieved within months.

HANA and Big Data: Our Global SAP HANA practice taps into the collaborative brain power across CGI. Our industry specialists implement best in class solutions by using a no nonsense, fact based approach. "Seeing is believing." We ensure that our capabilities and strengths are demonstrated consistently at numerous SAP events, in our own "Big Data" lab and importantly to our clients around the world.

We offer SAP solutions in combination with our own IP solutions to ensure our clients benefit from the best possible technology and a strong return on their IT investment.
