

Supply Chain Management

Macroeconomic fluctuations and continuously changing market conditions drive the need to review and improve the Supply Chain performance in order to remain competitive. CGI applies deep industry knowledge, technical excellence and global delivery expertise to help customers build leadership positions in their markets.

CGI SCM supports companies in change management. Our service portfolio offers best practice to support the full change cycle, from feasibility study to continuous improvement initiatives in the changed operations environment. CGI has extensive knowledge and experience and can support you in successful change. With our expertise, you can achieve the following:

- Decrease transport and warehousing cost
- Increase reliability - perfect order fulfilment
- Increase responsiveness - increase the speed at which a supply chain provides products to customers
- Increase asset efficiency - more output from assets by optimizing inbound and outbound flow
- Reduce stock levels - optimizing the different types of supply chains
- Increase agility - increase the capability responding to marketplace changes
- Reduce emissions - by optimizing and increasing transport and warehousing utilization

The CGI SCM proposition focuses on the clients' pain points to generate maximum value. We create a road-map from current situation through the selected potential improvements. It is possible to adapt our proposition in different parts of the Supply Chain and the scope can vary from basic awareness of improvement areas to a full scale solid realization plan for capturing business improvement opportunities.

When you have CGI as a long term partner, we can supply an end-to-end service, from business consultancy to technology selection and systems support, effectively combining CGI's business process knowledge and IT skills.
