

SCHAINX: SUPPLY CHAIN EXCELLENCE

Achieve more through effective planning, stores replenishment, inventory management and on-time delivery. Ensure your customers get the products they want, when they want them.

Supply chain excellence puts your business ahead of the competition. It provides a strategic advantage by taking quantifiable costs out of your supply chain operations, tightly managing inventory and on-time delivery, and optimising operational execution.

THE CGI ADVANTAGE

We unlock the integration value in Oracle E-Business suite to offer enormous opportunities for planning and operations.

Supply Chain Excellence provides the approach and capability to achieve significant efficiency and inventory value savings, to improve availability and customer service, and to enable greater transparency and flexibility from your supply chain operations.

Supply Chain Excellence introduces integrated and optimised end-to-end business processes. These are supported by, and get the most value from, the Oracle EBS suite of manufacturing and supply chain applications.

SUPPLY CHAIN EXCELLENCE

EXPLOITING VALUE

Our library of re-use content accelerates and de-risks design and delivery, with content covering process designs through to testing and training material. This is not a “cookie cutter” or pre-defined templated approach, but instead flexibly exploits the value from our previous delivery.

What we do	What you get
Optimised Business Processes	Clearly defined, flexible, optimised and integrated supply chain business processes, aligned with best practice and Oracle EBS standard R12 functionality and extensibility.
Maximised Oracle	Innovative, intelligent and creative configuration, with full use of EBS toolkit, to maximise order capture and transactional efficiency, accuracy, and standard functionality fit for business processes.
Data Management	Standardised product data that puts an end to duplication and resulting waste, and delivers ongoing data quality and ownership.
Inventory Procurement	A more controlled, automated procurement process, with complete spend visibility.
Single Source of the Truth	Insight and value from consistent, enterprise-wide visibility of inventory and transaction data. This translates into superior performance and benefits management, and identification of bottlenecks and waste to drive business improvements and cost savings.

Typical Benefits

- 20%+ more efficient operational and user interaction: get greater process and financial accuracy and control
- 10%+ lower inventory investment: have better visibility of inventory and demand, and better quality data for product catalogues
- More satisfied customers: meet service level requirements with on-time, in-full, error-free fulfilment, and use advanced availability visibility to drive sales
- Deeper insight from information: make better decisions, enhance planning and integrate business processes
- Greater sustainability: optimise exception and reverse logistics processes and minimise waste
- Boosted supply chain resilience: manage risks through greater visibility of the impact of change

Why CGI?

We understand your world. We're recognised by Oracle as a leading partner and afforded Platinum status. Our award-winning project Synergy delivery for Network Rail earned us their 2011 IT Partner of the Year award.

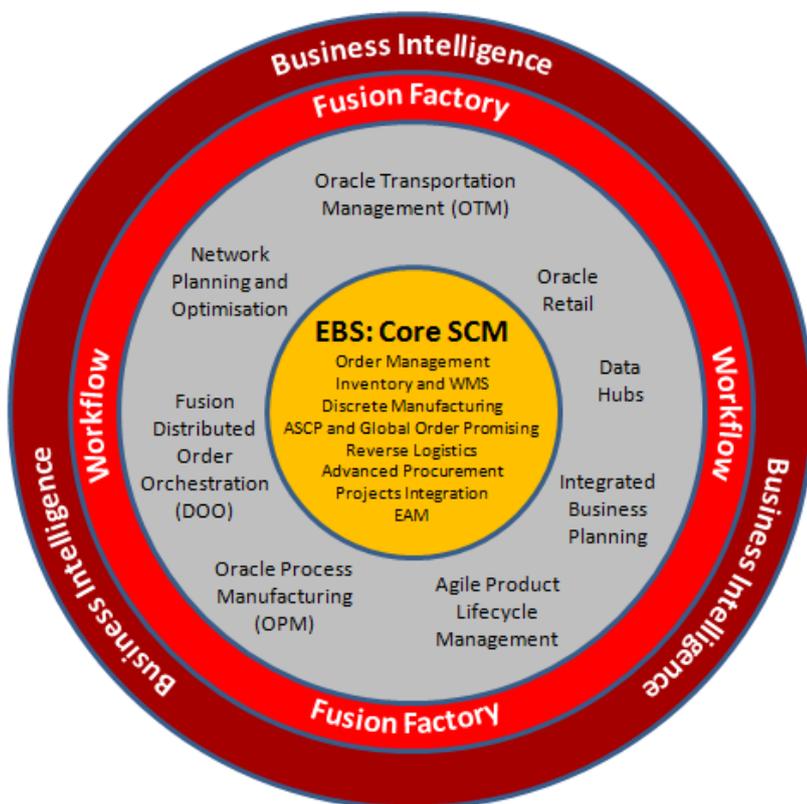

We're constantly looking to add value and efficiencies to your supply chain. The results are evident in the increasingly complex supply chain management, Oracle EBS, and technology projects we've successfully completed for our clients.

ABOUT CGI

With 68,000 professionals operating in 400 offices in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors.

Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results.

As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.

- Core Supply Chain Functionality
- "Edge" and Fusion Products/Services
- Technical Enablers
- BI
