Oracle Fusion Roadmap Services

I t's almost certain that over the years your application portfolio has grown larger and more complex whilst keeping up with your business. It's also almost just as certain that there are more than a few existing and new Oracle applications in the mix.

So depending on your plans for the future, it would be of benefit to evaluate new options, commit to new upgrades, or consolidate diverse portfolios. Whatever your plan, we would like to help make sure your business is getting the most value from your investment in Oracle and Fusion Applications?

OUR ANSWER

CGI's Oracle Fusion Roadmap Service

Our Oracle Fusion Roadmap takes the hassle out of navigating the future of your Oracle ERP and Oracle technologies. Our team of highly experienced Oracle consultants provide guidance and deliver a plan which breaks down the steps you need to take to move toward Oracle Fusion. We can provide estimates and costs and the other material you need to build a business case that will justify your investment.

So, what is Oracle Fusion?

Oracle Fusion is Oracle's new generation of enterprise technologies, applications, and services that will help you cut costs and increase business agility.

It's the next generation of Oracle ERP application and Fusion middleware. Functionally Oracle have created Fusion Applications and Technologies to combine the best of the E-Business Suite, PeopleSoft, JD Edwards, Seibel, Primavera and other software. On the technology side Oracle uses the market leading 11g grid database alongside industry standard SOA integration and J2EE user interface technologies. Most of this technology is now available under the Fusion Middleware banner.

Why do you need it?

It depends on your application portfolio strategy. If you choose to move to the Fusion applications you stand to benefit from new applications and latest functionality enhancements. We can advise on the changed application functionality, data storage, technology stack, methods of customisation and integration considerations.

FACT SHEET
ORACLE FUSIONS ROADMAP SERVICES

Key benefits:

- Understand your options

- Plan your journey into Fusion with achievable deliverables

- Act now to make it easy to transition and upgrade in future

- Benefit from increased flexibility and

If, however you continue to use your existing Oracle ERP applications under the Applications Unlimited programme you can continue to upgrade your existing applications, introducing Fusion Middleware technologies and co-existing Fusion Applications in line with your business plan.

Either way you need a roadmap to plan and to understand the steps you need to take along the way to ensure you get the best out of your applications and what Oracle have to offer.

TWO EASY STEPS AND YOU'RE ON YOUR WAY TO YOUR DESTIONATION

Our roadmap is not a 'blue sky' discussion document. It outlines the costs of every step that you need to take over the next three years to get the best out of your Oracle ERP applications. Written specifically for individual organisations, no two roadmaps are the same.

For example, for companies that need heavily customised reports, we hold business intelligence (BI) Publisher workshops with your development staff to make it easy to transition to the Fusion reporting technologies. Our SOA experts also tailor workshops for your unique needs for custom integration requirements, training or other knowledge transfer activities

What do you get?

- Initial assessment
- Options briefing paper
- Roadmap Plan
- Roadmap deliverables with estimates, resource requirements and costs
- Benefits statement including any cost savings for use in your business case

Here's how we do it:

Understand

We assess your current Oracle ERP infrastructure – this includes size, user base, customisation, module footprints, plans for new modules and customisations. We also discuss your organisation's future plans.

Plan

Our briefing paper makes it easy for you to choose from the options available in the Oracle ERP landscape. Whether you're an E-Business Suite client who wants a Release 12 upgrade or choose to remain on 11i with some custom extensions, we will produce a cost plan that makes the way ahead easy.

With our roadmap you:

• Maintain and possibly improve the Return on Investment on your Oracle applications

• Get a pragmatic, achievable approach to implement Oracle Fusion applications

• Reduce the Total Cost of Ownership of your Oracle applications portfolio

• Increase your business agility and productivity

• Reduce the risk of failure

• Lower risk with more flexible and future-proofed systems

• Reduce the cost of your next Oracle ERP upgrade.

WHY CGI?

CGI has significant experience of Oracle's ERP platforms as well as Oracle Fusion Middleware technologies gained from a wide variety of projects.

With a track record of delivering large, complex Oracle application and technology projects we have the skills, experience and knowledge to help you plan and execute the move to Oracle Fusion Applications and Middleware.

ABOUT CGI

With over 69,000 professionals in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects.
