

CGI's CLS Manager

The Continuous Linked System (CLS) continues to expand its reach and influence in the world of foreign exchange. And, we've been a part of it since day one. In fact, we helped to define the system. Now we are working with a large number of CLS member banks globally, making sure they stay ahead of the game by taking advantage of the latest CLS features.

Our market-leading solution, CLS Manager, has been designed to support member banks with the control, reconciliation and automation of their CLS business. Because of its component-based, multi-tiered architecture, CLS Manager does all of this with ease.

CLS Manager seamlessly integrates with a bank's IT environment, applications and financial messaging systems. Its architecture ensures a high-level of security and reliability, even if a bank regularly settles in excess of 400,000 trades per day. Its flexibility and scalability enables information to be delivered effortlessly between all internal departments, as well as third and fourth party organizations, regardless of size.

As the capabilities of CSL continue to expand and evolve, so do the features of CLS Manager.

- **Want to create new revenue?** CLS Manager provides the same benefits to third-party customers of settlement members as it does to the members' branches. The flexibility of the CLS Manager organizational hierarchy means that third and fourth party customers can be added to the structure using standard screens. This enables you to easily offer CLS services to your customers.
- **Want to protect your reputation?** With CLS Manager, our clients have peace of mind that they can meet their commitments in a timely manner. A full and comprehensive audit trail is also maintained and users are immediately notified of critical events.
- **Want seamless user interaction?** The CLS Manager user interface is browser-based, providing quick and easy access for users across the globe. With clear, configurable screens, the interface is designed to combine ease of use with a comprehensive, up-to-date view of necessary information.
- **Want cutting edge technology?** CLS Manager runs on a UNIX platform and is compatible with market-leading database and web servers. It interfaces painlessly with back-office systems using MQ messaging middleware and a wide range of standard SWIFT/XML message types.

KEY BENEFITS

- Automatic processes protect your reputation
- Flexibility to create new revenue streams through third-party users
- Maximum usability together with cutting-edge technology
- World-class systems integration and support

- **Want world-class integration?** CGI offers world-class system integration and project management capabilities, and we have an enviable delivery track record. With tailored product implementation, you can expect a risk free and cost effective delivery—on time.
- **Want comprehensive support?** We are here to support you 24/7. Our dedicated CLS Manager support center is staffed by skilled CGI consultants who have extensive experience in supporting mission critical systems for a global customer base.

WHY CGI?

With decades of experience, CGI has vast expertise in delivering payment solutions. As a pioneer in the CLS market, we have helped our client take advantage of new CLS initiatives from day one. CLS Manager has been in use since CLS went live in 2002 and is successfully employed by a significant number of settlement members to support CLS connectivity. In fact, we process more than 30 percent of the total CLS volume.

We were behind the original design of the SWIFT interbank network in the early 1970s, and since then, we've worked with 70 percent of the world's top financial institutions, including 8 of the top 10 global banks. Our clients are supported by more than 16,000 financial services professionals based in 40 countries.

ABOUT CGI

With 69,000 professionals operating in 400 offices in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.
