Momentum® at a Glance

Increasingly, federal agencies are seeking a highly-secure and cost-effective software platform. Such a solution must be user-friendly, capable of mitigating error and risk and flexible enough to support future system changes. Designed specifically for federal financial management, CGI's Momentum solution delivers these functions–within the time and budget that you need.

BUILT SPECIFICALLY FOR FEDERAL NEEDS

CGI's Momentum is a full-featured, flexible web-based system built to support the full federal financial, budget, asset and procurement management lifecycles.

Unlike other Enterprise Resource Planning (ERP) solutions in the market, Momentum is exclusively developed to support the needs of federal organizations, rather than layering federal functionality on top of commercial sector software. Momentum has no non-government functionality that must be turned off or maintained throughout its life.

In addition to our design and development approach, we also offer our Rapid Momentum Implementation (RMI) methodology for our out-of-the-box application, reducing risk, increasing user acceptance and decreasing implementation and life-cycle costs.

CGI's Momentum is:

- **Adaptable** to help you meet future legislative requirements, regulations and evolving business practices
- **Flexible** to give you the choice for on-site or in-Cloud deployment
- **Reliable** to maintain your process and data integrity
- **Accurate** to enable better operational and programmatic decision making
- **Safe** to protect your data while meeting the strictest federal security requirements
- **Accountable** to stand the test of rigorous federal operations and audits
- **Agile** to provide quick access to real-time financial results
- **Efficient** to enhance accounting control and improve mission delivery

COMMITTED TO SUCCESS

In an environment characterized by changing requirements, CGI created Momentum to support the long-term success of our government partners.

As such, Momentum transcends just meeting basic requirements by providing numerous value-added capabilities including flexible user interfaces, robust reporting, and secure data management.

With full federal financial management capabilities, Momentum provides accurate and timely information upon which to base sound business decisions, while at the same time achieving mandated information assurance and auditability requirements.

KEEPING UP IN A DYNAMIC ENVIRONMENT

The federal market experiences unlimited updates to requirements and compliance needs. We understand that these changes need to occur as quickly as possible to stay compliant with federal mandates. To address these concerns, we have developed our system to be easily configured for future legislative requirements and quickly deployed, while maintaining your data integrity–because you can't afford service disruptions and data issues.

A TRUSTED PARTNER WITH A PROVEN SYSTEM

For more than 40 years, federal agencies have trusted CGI's Momentum to help them manage their finances and make the best use of their data. Our experience includes:

- 100+ federal financial management customers since 1984
- 85 Momentum deployments in the past seven years
- 100% track record of implementation success
- 19 successful upgrades from FFS to Momentum
- 90% of customers remain on baseline software with zero customizations
- Patented federal-specific approaches to purchase card reconciliation and payment offsets
- Successful conversion of millions of historical financial transactions from federal agencies' legacy systems

OPTIONS TO SUPPORT YOUR BUSINESS NEEDS

While Momentum supports the eight requisite federal business processes, it allows you the flexibility to deploy as many or as few as you need. Additionally, our platform enables you to leverage existing and future infrastructure investments. This effectively positions you for future business and system streamlining, and helps drive down the cost of meeting your mission goals.

ABOUT CGI

At CGI, we're in the business of satisfying clients.

For 40 years, we've partnered with U.S. defense, civilian, and intelligence agencies to support their mission-essential needs at every stage of the program, product, and business lifecycle.

As a global leader in IT, we deliver end-to-end services and solutions in application and technology management, systems integration and consulting, business process management and services, advanced engineering and technology services, and operational support services.

Our mission expertise includes defense, intelligence, environment, financial management, healthcare, homeland security, financial management, and housing.

CGI has 65,000 employees in locations worldwide.
